Subject: BILL SB 2384

Dear Study Commission members,

I Danyca Hope Penick am writing to ask for your support of the passing of bill SB 2384 to improve patients' accessibility to medical care from licensed Naturopathic Physicians. Passage of this bill is very important to me. Both my sister and my mom were greatly helped by naturopathic treatments that were not covered by any insurance. My sister passed away from a GBM brain tumor in 2014 and my mom died from LBD Dementia in 2021. They both found relief from their suffering through interventions that were not covered by any insurance and my family herefore paid for out of pocket.

Thank you for your consideration.

Sincerely,
Danyca Hope Penick
