Subject: Bill Number H7299 Support

Dear Chairwoman Donovan,

I, Sheryl Weston am writing to ask for your support of passing of this bill H7299 to improve patients' accessibility to medical care from licensed Naturopathic Physicians. These physicians are trained to treat the symptoms of disease, not just to provide medication to manage a disease. They also work with patients to follow healthy lifestyles through diet and exercise for disease prevention. These lifestyles often result in less illness, less disease, and less hospitalization and medical treatment. Everyone benefits from this.

Passage of this bill is very important to me and my family.

Thank you for your consideration.

Sincerely,
Sheryl Weston
