Subject: H 7884

Hello

I am writing in support of H 7884, banning transgender procedures for minors.

The fact that medicine has indeed come a long way does not mean it should be used to change the gender of our youth. I am sure we can all remember the changes one goes through prior to adulthood. Many of the changes are natural developments or trendy in nature. Having said this, I do not believe that kids can or should be making this life altering decisions. Why would we allow this when minors are considered to be too young to vote, consume alcohol or join the military.

It is our God given responsibility to teach and protect our children not destroy their lives. When they are adults they can make their own decisions.

Thank You
