Subject: H7884 RI's Children deserve help not harm

Good morning,

I am writing in support of passing this bill to protect our children. I am in favor of prohibiting gender transition procedures for minors, uses of public funds for that purpose, and discipline for health care providers for providing the same.

In my opinion, this ideology is child abuse and enables delusional beliefs. These procedures cause physical harm, infertility, cancers, disease, mental illness and psychiatric disorders, almost always with irreversible outcomes. Also, in my opinion, state, schools or health professionals not informing parents of children having gender issues undermines parental rights. This gender ideology is promoting a delusional lie and is harmful to all, especially to children. Treatment for help with this should be available to the families and child.
