Subject: H 5168 Support

To the Health and Human Services Committee;

I SUPPORT H 5168. Fossil fuel emissions and climate change have numerous health consequences. If US healthcare were a country, it would be the 5th largest producer of green house gases.

For the health of our patients and that of the planet, RI health care facilities need to begin shifting their energy to renewable sources.

Thank you,

Kathleen Carney-Godley, MD FAAD
