Subject: Bill H5351

Your letter is already well-written and effectively conveys your support for Bill H5351. Here's a slightly refined version with improved flow and clarity:

Subject: Strong Support for Bill H5351

Dear Clerk Steve Sepe,

My name is Erica Sciarra, and I have been a licensed aesthetician with a tattoo license for five years. Throughout my career, I have provided clients with a range of services, including facial chemical peels and microneedling treatments.

Recently, I was informed that I can no longer perform microneedling treatments. This is deeply concerning, as I have undergone extensive training in skin conditions, adverse reactions, and procedural protocols. I uphold the highest standards of care and make patient safety my top priority. In fact, I have never had a patient experience an adverse reaction under my care due to my strict adherence to safety protocols.

If this bill does not pass, it will significantly impact my ability to earn a living by restricting services I was previously permitted to offer my clients.

For these reasons, I strongly support Bill H5351, which would allow trained and certified professionals like myself to continue providing safe, effective treatments. I urge you to support this bill to ensure that skilled providers can continue practicing within their scope of expertise.

Thank you for your time and consideration.

Sincerely,
Erica Sciarra
