Subject: Bill H5351 med spa safety bill

To whom it may concern:

Bill: H5351 (med spa safety bill)- goes directly against recent health department guidance to regulate non-physicians from doing a variety of spa procedures, many of which are considered the practice of surgery.

Current medical research does NOT support non-physicians ability to safely perform these procedures. These are risky medical procedures and need physician oversight.

I oppose Bill H5351. Please reach out if you would like further elaboration on my viewpoint.

Regards,
Holly Favell Gray
