Subject: Support of billH-5351. Attn clerk Steve Sepe.

To Whom It May Concern:

I am writing in support of companion bills H-5351 that purpose all medical professionals and aesthetic professionals in RI may work and delegate to the full extent of their scope of practice.

I have been under the care from an RN and an RNP for my aesthtic treatments for at least 14 years. Their care has always been exemplary. The 3 professionals I have had treat me have been professional, conscientious, gentle, and had wonderful technique.

As an RNP myself, these are values I look for in any health care professional.

In my practice, I had a patient in the past who presented for her physical exam. I noticed her face was asymmetrical, badly bruised, and swollen. I questioned her as to how the injuries had occurred and she told me a plastic surgeon, whom she named, had given her filler and toxin injections. Needless to say, she was very upset and rightfully so! In all my years of treatment, I can count the number of small bruises I've had after an injection without any other complications.

The RN and RNP in my providers office, provide safe treatment in a relaxed, comfortable environment. I hope never to lose them!

Sincerely,

Jane Roy, RNP, MSN
