Subject: Support for Bill H-5351

Good morning,

I am writing to express my concerns about the potential effects on my personal medical care and employment should the proposed bill fail to pass. I understand that the outcome of this legislation will have far-reaching implications, and I would like to outline how this decision might directly affect my life.

Firstly, without the passing of the bill measures, I am worried that I will face reduced access to services and higher expenses I obtain at Face First in North Smithfield, RI.

Secondly, I am also licensed as a Nurse Practitioner to provide these services. The stability of my employment is closely tied to the benefits provided by this legislation. If the bill does not pass, I foresee increased uncertainty regarding my job security and the continuation of the benefits that are critical to maintaining my financial well-being.

I appreciate your attention to this matter and kindly request that my concerns, along with those of many others in similar circumstances, be considered during the decision-making process. I look forward to receiving updates on the status of the bill and any further measures that may be implemented to safeguard the well-being of employees and patients like myself.

Thank you for your time and understanding.
