Dear members of the Rhode Island Health and Human Services,

I am writing to support the proposed legislation aimed at protecting the scope of practice for licensed healthcare providers in aesthetic practice in Rhode Island . I have been a patient of Jana Magarian, nurse practitioner for 8 years and can attest to the exceptional quality care she provides both in the primary setting as well as in aesthetic medicine . Ms. Magarian has been treating a chronic skin condition I have, called rosacea. Through a combination of topical medications and broadband light, all provided my nurse practitioner, my condition is in remission . I can't begin to express how much better I feel about myself and what it has done for my self confidence . I am much more social and have made strides in my career that I would not have otherwise realized. I have full trust in my nurse practitioner . She listens to me and has figured out a manageable plan for my skin condition . I value my health and well being and fear losing my excellent care . Please protect my access to my provider.

Sincerely,  
Justine Pinckard
