

To whom it may concern,

I am in opposition of bill H5351, it undermines the trust empowered to our elected officials to safeguard the public from charlatans in the practice of medicine. It is malfeasance to allow for incompetence and foreseeable consequences to the public who were wrongly misled by public officials negligently vetting the un supervised practice and procedures posing to improve cosmetic, pain, vitality and weight loss. The RI State Medical Board opposes this bill, every house member should do so as well, to vote otherwise is immoral.
