To whom this may concern,

I am writing to express my strong support for Bill H-5351, which would allow my sister-in-law, Kristina Tasca, to continue practicing and running her business, Skin Society, in Cranston, Rhode Island.

Kristina and the team at Skin Society provide the highest level of care to their patients, offering services that are both effective and safe. Kristina's dedication to her craft is unwavering, having built her practice around not only the highest standards of patient care but also ongoing education and professional development.

Kristina's practice employs trained professionals who work diligently to meet the individual needs of their patients. She consistently goes above and beyond to make sure she is fully qualified for each treatment she provides.

The medical aesthetic industry, like other healthcare sectors, plays an important role in patient care. Nurses and healthcare professionals in Rhode Island should have the right to continue providing care and services in their areas of expertise. Patients, in turn, deserve the right to choose the medical professional they trust most for their healthcare needs.

I urge you to support Bill H-5351 and help ensure that professionals like Kristina and others in the medical aesthetic industry can continue to operate their businesses and provide exceptional care to their patients. We should not limit the role of qualified nurses and health care professionals who are committed to improving patient outcomes and building the aesthetic community.

Thank you for your attention to this matter.

Sincerely,
Lauren Pannone Tasca
