Subject: I STRONGLY support Bill H-5351

To whom it may concern,

I am writing to express my strong support for Bill H-5351 and urge you to support it as well.

My daughter, Kristina Tasca is a co-owner at Skin Society in Cranston, RI. For years, Kristina has dedicated her life to being a nurse and caring for patients, striving for the best outcome each and every time. Based on her experience alone, she is a highly qualified provider. She spent years in nursing school, graduating at the top of her class while working at Hasbro Children's Hospital and upon graduation being awarded a job there. She balances her life with three children under 3 and her med spa flawlessly. For months, while pregnant with her third child she built a beautiful med spa and had just opened when this industry changed.

Kristina, along with other nurses and healthcare providers deserve the chance to continue to provide aesthetic services, care and support to their patients. I trust my daughter, Kristina completely and want the ability to choose her as my provider. She has the knowledge, experience, and commitment to provide exceptional care, and she deserves the opportunity to practice to the full extent of her abilities.

I urge you to support Bill H-5351 and ensure that skilled professionals like Kristina can continue caring for their patients. Thank you for your time and consideration.

Sincerely,

Maria Haughey
