**Re: Support for Bill H-5351**

To Whom It May Concern,

My name is Nikos Revis, and I am the proud father of Lexi Revis. I am writing to express my full support for Bill H-5351, as it directly impacts the future of my daughter and countless other nursing professionals across the state of Rhode Island.

Since the beginning of her career, my daughter has dedicated herself wholeheartedly to perfecting her craft. She has spent countless hours, including sleepless nights, working toward becoming the most skilled and knowledgeable aesthetic nurse injector she can be. Her commitment to excellence in both her education and her practice has been unwavering, and she has invested so much to ensure her patients receive the safest, most effective care possible.

If Bill H-5351 is not passed, my daughter will lose everything she has worked so tirelessly to achieve. She is currently furthering her education with the goal of becoming a Family Nurse Practitioner (FNP), a role she is deeply committed to in order to broaden her scope of care.

As a father, I am deeply concerned about the potential mental and emotional toll this could take on the nursing community. For many nurses, this work is not just a job—it is their livelihood, their passion, and their calling. The loss of this opportunity could be devastating to so many families, businesses, and communities across our state.

My daughter is an incredibly strong, intelligent, and focused nurse. She is on the path to becoming a future Family Nurse Practitioner, and nurses like her have more than earned the right to continue practicing in this field. They have undergone rigorous education, training, and continued learning to ensure they are providing the best care possible. Nurses are more than capable of safely administering services like Botox and filler treatments, and they should be allowed to continue practicing in these areas with the confidence that their skills and knowledge are respected.

I implore you to stand with us in supporting Bill H-5351. Nurses like my daughter are the backbone of our healthcare system, and it is crucial that we ensure they have the ability to continue serving their communities with the passion and expertise they've worked so hard to develop.

Thank you for your time and attention to this critical matter.

Sincerely,  
Nikos Revis
