Subject: Support for Bill H-5351

To Whom It May Concern,

Estheticians are highly trained in skin health, receiving specialized education in anatomy, physiology, and advanced treatment modalities. Their expertise ensures that services like microneedling and chemical peels are performed safely and effectively to protect public health.

Restricting these procedures would ignore the extensive training they undergo and undermine the profession's credibility. Instead of limiting estheticians, Rhode Island should recognize and support their expertise by passing Bill H5351, ensuring that the state maintains high standards of skincare and safety.

Rhode Island Estheticians have raised my confidence by healing my acne and acne scars with chemical peels and microneedling.

Thank You,

Bobby Bradford
