**To:** House Health and Human Services Committee  
**Subject:** Bill H 5856

I am in 100% agreement with Bill # 5856

There is an act called the Nuremburg which states if a drug is experimental you cant be mandated to take it. People must have informed consent. If there is no factual timely research on efficacy and side effects it should not be forced on people.

Also if there is a religious or medical reason there should be exemptions.

Catherine Canavan, RN
