**Subject:** House Bill H5859

Good afternoon,

As a citizen of Rhode Island, I am writing in support of House Bill H5859.

This bill will allow patrons/employees of a business on a private well to use the restroom and not trigger the need for a public well based on volume of people using the facilities. Instead adequate signage would be posted on bathroom walls stating water is untreated and for washing only.

This will support the growth of rural small businesses and directly improve the quality of life of my business.

I humbly ask your support of this bill.

Sincerely,

Maria Rinaudo  
Resident of Coventry, Rhode Island
