Subject: House Bill H5859

Hello,

I am writing this in support of House Bill H5859. This bill will allow the economic development of areas of our state where municipal water is not available and public wells are impossible or infeasible.

This simple bill would allow businesses to operate with a sign stating water is not potable in public restrooms and is to be used only for washing and not consumption.

Passage of this bill will generate jobs, help small businesses, reinvigorate local economies in the rural parts of our state and generate much needed taxes for the State and Towns.

Please support House Bill H5859

Thank you,
Scott Davis
Bristol, RI
