**Subject:** Comment on H6304

Hello,

My name is DeeAnn Guo, and I am a community organizer from the Childhood Lead Action Project. We are a non-profit founded in 1992 dedicated to the elimination of childhood lead poisoning in Rhode Island.

Just a quick comment below on House Bill 6304:

As the letter from Jerome Larkin states, Childhood Lead Action Project was in brief discussions with RIDOH on a different bill regarding lead service line replacements. We would like to help clarify and strengthen current laws.

However, we are concerned about this specific proposal's language that seems to weaken the existing law and would welcome a further discussion to ensure that RI maintains its commitment to replacing all lead service lines.

Thank you very much,

DeeAnn
