Hi,

I'm a lifelong PVD resident writing in for my support of Rep. Kislak's legislation to expand the zone of speed cameras.

As we all know, auto crashes are a leading cause of death in the US, and speed cameras have demonstrably proven to be effective in slowing cars down. As someone who tries to walk and bike most places, I feel especially susceptible to reckless driving, and fully support any measure to improve pedestrian safety.

Just last week there was a high speed crash in PVD causing multiple injuries. <https://www.youtube.com/watch?v=x3Pww823QUU> - this cannot be written off as an accident. Motor vehicles are dangerous, and we should ensure through every possible measure that they are operated as such.

Thank you.
