

To House Committee on Judiciary,

My name is Jason Romblad, I am from Woonsocket. I am writing today to voice my support for bill H5923. Thank you to the sponsors for introducing this bill.

It seems that this bill is needed as there are adults providing books which include pornographic drawings, to our children, calling it education. I have seen various whistleblowers over the last few years, show some books that are provided to minor children, which include pornography "drawings". I do not believe our children should have access to these types of books in our schools.

Please, vote in favor of this bill, to help protect our children. Thank you.

Jason Romblad
