Vote no on the awb. The mag ban created victimless crimes. People who assault or commit homicide with any instrument including hands and feet can already be charged. Obviously, the mag ban argument was a lie. It never was intended to stop assault, battery, or homicide and has done nothing. Awb is more of the same. Why not just buy houses from 2a supporters at market rates and pay a bonus of two years salary to get 2a supporters to leave the state in an honest attempt to get an empire of cultural Marxist residents. That is the real goal isn't it. Let's be honest. The supporters of this bill have zero interest in helping anyone. If they did, they would be spending time for making sure primary care was available in the state and early intervention mental health would actually be available to prevent homicides rather than criminalizing the public.

As the state implodes, who will be left holding the bag and paying the bills.
