Hello

I respectfully urge you to support House Bill 7354, which would allow safe lane filtering for motorcycles—passing stopped or slow-moving vehicles at low speeds—to improve rider safety and traffic flow. Legalizing lane filtering will help reduce the risk of rear-end collisions for motorcyclists, ease congestion, and align Rhode Island with other states that have adopted this proven safety practice. Thank you for considering this sensible and rider-focused update to our road laws.

Thank you,

Dan DeCosta

Warwick, RI
