To the House Judiciary Committee,

I'm writing to you from a security booth during my night shift because while you guys are debating "process," federal agents are busy executing ICU nurses and shooting moms in the face in Minnesota. We see the "quiet" erosion happening here in RI. We know the feds don't think the Constitution applies to them. H7202 (The Federal Constitution Defense Act) is the only thing currently on the table that gives regular Rhode Islanders a way to bite back when federal "immunity" is used as a license to kill. My mom is a VA employee. She's a Trump supporter. I'm a lesbian mom who doesn't agree with her on much, but we both agree that being gunned down for rendering aid is tyrannical bullshit. Pass H7202. Give us the right to sue these masked goons in our own state courts. Or just admit the Constitution is a suggestion and stop wasting our tax dollars.

Have the day you vote for,
Shannon Murphy
