Dear Committee,

I am writing to urge you to oppose H8073, S2710, and other gun control legislation advancing this session.

These bills go far beyond regulating future sales. They directly target individuals who already lawfully own firearms by making possession of commonly owned firearms illegal.

H8073 and S2710 would criminalize continued possession of firearms that Rhode Islanders legally acquired. This is a significant escalation and moves toward confiscatory enforcement of firearm bans.

Policies like these punish peaceable individuals while doing nothing to improve public safety.

Rhode Island residents should not face criminal penalties for possessing firearms they lawfully own.

I urge you to reject H8073, S2710, and any legislation that expands restrictions on the rights of law-abiding citizens.

Please vote no on these measures and defend the right to keep and bear arms.

Yours sincerely
Christopher Face
