You don't often get email from trn245@gmail.com. [Learn why this is important](#)

I write to you to beg you to support Bill H7760. I watched my father-in-law decline to the point of drooling half of his food down his Chin and onto his shirt he had to wear diapers because he could not control his bodily functions. Then suffered for months before he passed.

My wife was diagnosed with glioblastoma in June 2023. It was two years of decline until I had to feed her and she could not walk or talk anymore. I have decided that if I receive a terminal diagnosis, I am not going to seek treatment. Living without being able to feed yourself, control your bodily functions and suffer for an indeterminable amount of time is not living. We euthanize our pets because we don't want them to suffer. Yet we tell humans we don't care about your quality of life or how much or long you suffer that is inhumane. As of now, my only option is to travel to Oregon if I would like to end my life without suffering. I urge you all to please pass this bill and give us this option.

Thank you, Thomas Netter
