

I have not suffered directly from the Covid vaccine mandates, but I have healthcare workers who lost their jobs and consequently I lost my access to them. They suffered considerably due to lost income and reputational harm which affected not only them, but their families as well. The total effect of the vaccine mandates exceeded any possible benefit and, as is now clear, the mandates were unnecessary and counterproductive. Please do the right thing and prevent this violation of constitutional and legal rights from happening ever again by voting for H7797.

Sincerely

Charles R Delamater
