

Many lives have been destroyed with individuals left mental health issues, unemployment and some have lost their lives all because there are no laws out there that support victims yet bullies boast with pride how employers will never get rid of them. They are proudly and arrogantly causing pain in others knowing that it's easier for employers to get rid of the victim than get rid of them because they work in a way that they terrorize those who witness their sick games and survive to a point that no one can ever go against them.

Not only that I have lived this for years but my child was retaliated on to cause me the pain because I had ignored their coward behaviors towards me. The bullies used their children to bully and alienate my child. I had to switch my child to a different school which she ended up not attending due to covid-19.

Covid-19 was like a life saver to our family. No disrespect to those who have lost their lives and those whose loved ones have lost their lives. My child attended school through distance learning and my job sent employees to work remotely.

Bullying is real, the damage it costs is a lifetime damage. Leaning towards God gave me hope. My past experiences saved my life. My child will never be the same.

Please find it in your heart make bullying at work place illegal. Take the power of bullies away by holding employers accountable.

Thank you,
