

Dear Sir or Madam,

I strongly support bill H7382, if approved it will reduce limits on all types of renting (summer, winter, and annual rentals). It also will provide housing for URI students who currently do not have enough housing on campus. Narragansett in particular is legislating itself into an elite millionaires club that doesn't understand it cannot self sustain, without tourism and college rentals. Average home costs in town cannot be afforded by 75% (or more) of R I residents. How much longer will we allow out of state part time residents and recent move-ins to dictate the legislation in our Town's and State?
