

Opposed H 7665 I am writing to express my opposition to H 7665. It is important that all property owners retain their property rights. It is also important that sellers be able to expedite the sale of their properties in this strained housing market rather than having a grace period of 60-90 days before being able to list their property for sale on the open market. Please reconsider the consequences that this proposal may have on our already tough housing market which lacks inventory. Thank you for your time.
