

Dear Committee clerk Huntley,

I'm opposed to H7891. As I stated in my previous email unless the city and state are going to cap all the other costs associated with housing including taxes, insurance, renovations, repairs and upkeep, water sewer and all other utilities then legislation like this makes absolutely no sense. Furthermore there appears to be more cost associated with this than will apply to all other taxpayers as well, who is going to be paying for this board that the city will be creating? This legislation is nonsense. Regards,
Christohper L Smith

I am writing in STRONG opposition to H7891. This bill seeks to:

- Set Rent Control - which the city can change every year;
- Implements citywide rental registry;
- Creates Just Cause Eviction policy/removes owner ability to not renew a lease and requires that owners pay tenants to move;
- Allows tenants to escrow rental payments rather than pay landlord due to violations but is unclear;
- Prevents building permits from being issued if violations are on record;
- Requires landlord pay tenant relocation fee if landlord asks the tenant to move for the purpose of renovation, condo conversion, or for a family member to occupy - an amount would be set by the board created under this law;
- Allows the city to create a board to govern these regulations which may be continuously changed.

I believe that this proposal severely impedes on my property rights and creates a scenario in which it will be impossible to plan for expenses and repairs from year to year. The terms set forth in this proposal are also extremely vague and allow much room for over-regulation and bias, unjust enactment of laws. Any such provision in this proposal either separately or in combination will further burden the ability and motivation to create more housing. Creating more housing is the only solution for any problem which this proposal seeks to remedy.

Please research the severe implications that all of these proposals would create. Please consider this resource in your decision-making
