Subject: House Bill 5704

Follow Up Flag: Follow up
Flag Status: Completed

Please support House Bill 5704 to ban the rat poisons that are killing raptors. These majestic apex predators play a crucial role in maintaining biodiversity by naturally controlling rodent populations. By protecting raptors and helping their populations recover, we can achieve a more balanced ecosystem without relying on harmful poisons.

The Audubon Society also provides alternative solutions for rodent control for those seeking safer, more sustainable options.

Thank you for your time and consideration.
