From: Vicki Todd

Dear Members of the House Committee on Municipal Government and Housing.

I write this letter to you to show my support of the passage of *House Bill 5704* to ban first and second generation anticoagulant rodenticides.

I am a long term observer of nature and the environment. I believe every living thing should have a viable food source. Diversity is key to a richer environment for us all.

When there are safe alternatives to traditional pest control measures that will not cause harm, why would we not choose to use them?

I urge you to consider the safer forms of rodenticides that will not harm other species.

Thank you.

Sincerely

Vicki Todd
