

OPPOSE H8363

Hello,

My name is Riley Quinn and I am an out of state student at URI living at 45 Isabelle Dr in Narragansett. As an out of state student from Pennsylvania, I cannot express how important off campus housing has been to me. As you should be aware, URI has a shortage of housing for deserving students in the first place, so limiting the availability of off campus housing, would deny thousands of students who love this school the opportunity to remain here due to a shortage of housing.

Limiting the amount of housing available to students off campus, shows discrimination and bias against college students that already exists locally in Narragansett. As an off campus student who has had multiple neighbors express their appreciation for how myself and my roommates behave, I truly think it is unjust to stereotype all college students and how they behave in houses. These stereotypes should not be limiting and prohibiting to all students simply trying to find somewhere to live during their college years.

I hope this bill is reconsidered and the impact on thousands of college students is acknowledged and dealt with justly to all,

Thank you,

Riley Quinn
