

Testimony in support of H7230: Rhode Island Native Plant Month

George Voutes, 17 Shore Road, Bristol RI, 02809

Date of Hearing: March 17, 2026

To Chair Representative Alzate and the honorable Members of the House Special
Legislation Committee

I support H7230, specifically to be known as Rhode Island Native Plant Month of May
Annually. There is a real lack of public knowledge and understanding across RI on the
importance of Rhode Island's native plants and the need to preserve and increase them.

Please bring this bill to a vote and pass it this legislative session. Pollinators across RI
needs native plants to survive and help RI sustain food we need to survive.
