

When we think of "Victory" being the dropping of two atomic bombs on over 200,000 civilians men women and children it defies the idea of what Victory actually is. Those two bombs did not bring Victory it opened the gates of Hell. Today we are still living with the consequences of those two bombs. We also live with the fear and anxiety that we will someday be the victims of that same kind of "Victory".

We will only have victory when those weapons are buried and decommissioned and war is outlawed. I strongly support H7781 the renaming of "Victory" Day to Peace and Remembrance Day
