

I am writing in support of the House Resolution No. 7217 and 7218 and against House Concurrent Resolution No. 7256.

Our students are suffering anxiety, learning loss, speech delays, and reading delays. It is time to get the masks off.

I support my fellow community members who choose to continue masking and I realize this transition to normal may be an emotional one for many, however, we can no longer hold our children back for fear.

Many other states are paving the way... Let's join them here in Rhode Island and show that we are ready to help our kids get back to normal.

Sincerely,
Amy Forbes
