

Hello.

My husband and I are writing to oppose H7007. Protecting the Military Vote is a honor. The emailing of ballots is not secure for many reasons, top among them involve hacking possibilities and stolen passwords. So, at the very least, if the emailing process is to continue for the Military and others, it would be advisable to wait for the voter to request a mail ballot. Ballots should not be mailed out en masse to any group. Anyone needing one should request one individually. Otherwise, eligible voters should be at the polls in person on the day...

Thank you,  
David and Kathleen DePasquale
