Subject: Oppose S2341 SubA

You don't often get email from mrocha18@cox.net. [Learn why this is important](#)

I am writing to respectfully oppose S2341 Sub A, which would allow eligible disabled and military voters to continue using electronically transmitted ballots as enacted in 2022.

While I strongly support making voting accessible to all citizens, including disabled and military voters, electronically transmitted ballots raise serious concerns about election security, ballot privacy, and system vulnerability. Voting systems should remain secure, transparent, and verifiable, and electronic ballot transmission may expose the process to cybersecurity risks.

I urge you to oppose S2341 Sub A and instead support solutions that protect both voter access and election integrity.

Thank you for your time and consideration in this matter.
