All data for these calculations was pulled from the State accounting system or supplied by reports from the Division of Taxation. Information presented from the NOV REC was also considered.

Personal Income

Tax Accruals – Fiscal 2025 Impact Estimate as of April 2025. All \$ amounts in millions.

	FY'24 Actual	FY'25 Estimated	Estimated Revenue Impact	
Refunds Payable*	\$(225.50)	\$(250.31)	\$(24.81)	Increase to liability/decrease to revenue
Receivables **	\$277.72	\$228.06	\$(49.65)	Decrease to receivable/decrease to revenue
Net Change	\$52.22	\$(22.25)	\$(74.46)	Revenue Decrease

*For balance of CY2024 refunds and ½ of CY2025 refunds

**Primarily ½ of payments expected with returns in Spring 2026 for CY2025

Significant part of the reduction in revenue is due to \$37.32M of extension payments attributable to FY24 received during FY25.

PIT Accrual Methodology for May REC

Each category presented uses a 5 year mean average methodology for both revenue and payables. This has been the standing methodology for the past four years, except for Estate Taxes, which now uses this methodology.

Exception for June 2024 which effects May 2025 Revenue Estimate:

Receivable: The mean average was calculated and the actual amount of extension payments received during July 2024 \$37M was subtracted from the accounts receivable amount during FY25 as it was accounted for in FY24 resulting in a reduction of the receivable of \$37M.

Payable: The mean average was calculated without the extension payment cash received as noted above. The change to the payables is an increase of \$25M.

NET REDUCTION IN REVENUE: \$74M
