# Who We Are

---

CLF protects New England's environment for the benefit of all people. We use the law, science, and the market to create solutions that preserve our natural resources, build healthy communities, and sustain a vibrant economy.

# The Truth About Clean Energy

---

Clean energy programs promote **affordable**, reliable energy with long-term savings for all Rhode Islanders.

Act on Climate **commitments** began before, and will extend beyond, policy disruptions at the federal level – many of which are only proposed or under litigation.

# Priority Recommendations

---

- Promote heat pump adoption
- Stop the build out of the gas system
- Maximize transit mode shift
- Ensure affordable access to transportation for all Rhode Islanders
- Maintain our renewable energy standard and energy efficiency programs
- Manage the clean energy transition

# Any Questions?

Thank you!
