### DEFINITIONS

**Federal revenues** include direct grants-in-aid to schools or agencies, funds distributed through a state or intermediate agency and revenues in lieu of taxes to compensate a school district for nontaxable federal institutions within a district's boundary.

**Intermediate sources** of revenue include those revenues collected by education service agencies with fundraising capabilities. [Education service agencies](#) operate between the state and local government levels. One example is New York's Board of Cooperative Educational Services (BOCES). Intermediate revenues are included in local revenue totals.

**Local revenues** include revenues from such sources as local property and nonproperty taxes, investments and student activities such as textbook sales, transportation and tuition fees and food service revenues. Tuition and transportation fees collected from other local education agencies are not included.

**State revenues** include both direct funds from state governments and funds in lieu of taxation. Revenues in lieu of taxes are paid to compensate a school district for nontaxable state institutions or facilities within the district's boundary.

# # #

**Inflation adjusted** using the Consumer Price Index; adjusted to the 2015–16 school year.

**Regional cost adjustments** made using the Comparable Wage Index (see access to source below). Calculations made by NCSL.
