

Errata

The [*Budget as Enacted Fiscal Year 2025*](#) publication was distributed on July 10. Staff found two errors after printing that have been corrected in the online version. The following provides a description of the changes to the printed publication.

Summary - page 45 of full publication, page 11 of the [report](#)

The FY 2026 growth rates in the table have been corrected. The revenue growth rate should be 2.8%, not 3.1%. The usable revenue growth rate should be -2.1%, not -0.5%. The expenditure growth rate should be 2.5%, not 4.3%. This does not affect any of the FY 2026 dollar values in the table.

State Aid to Local Governments - page 705 of full publication, page 13 of the [report](#)

Due to a formula error, the totals at the bottom of the “FY 2025 Enacted” and “Change to FY 2024 Final” columns are overstated by \$28.0 million each. The “FY 2025 Enacted” total is the same as the “FY 2025 Governor” and should be \$324,298,176, not \$352,298,176. The total change to FY 2024 final should be \$28.0 million, not \$56.0 million. The city and town totals are correct and do not change.
