State Aid to Local Governments

State aid for local governments for FY 2015 is estimated to total \$77.3 million from state general revenues under current law. Funding for general aid programs for FY 2015 includes \$65.5 million. It also includes \$11.8 million for restricted use programs. Local units will also receive \$14.3 million in public service corporation property taxes that are collected on their behalf by the state.

The graph below shows the relative allocation among state aid programs from FY 1990 through FY 2015 current estimates.

Total state aid to local governments is \$77.3 million for FY 2015. That includes only state funding; it excludes the \$14.3 million for the public service corporation property taxes. Prior to the 2008 economic downturn, the Assembly increased local aid funding significantly, with most of the increase occurring since FY 1998 with the addition of new programs and significant changes to existing ones in response to disproportionately high reliance on property taxes compared to other states.

Rhode Island ranks high on state and local taxes, both on a per capita basis and as a percentage of personal income, 12th and 13th on both measures in FY 2011 according to data from the U.S. Census Bureau.

Rhode Island property taxes comprise 56.1 percent of all local revenues; nationally they comprise only 29.4 percent. The Rhode Island percentage is the 3rd highest in the United States, partially due to the fact that Rhode Island local governments are not allowed to levy local option general sales or income-based taxes.

FY 2011 Data from Bureau of Census	Rhode Island	United States	Rank
All State and Local Taxes			
Per Capita	\$ 4,832	\$ 1,296	12
As Percentage of Personal Income	11.0%	10.3%	13
State and Local Property Taxes			
Per Capita	\$ 2,160	\$ 1,377	5
As Percentage of Personal Income	4.9%	3.3%	2
Percentage of Income, Sales and Property Taxes	55.2%	42.3%	6
State and Local Income Taxes			
Per Capita	\$ 908	\$ 915	17
As Percentage of Personal Income	2.2%	2.2%	29
Percentage of Income, Sales and Property Taxes	24.7%	28.1%	33
State and Local Sales Taxes			
Per Capita	\$ 784	\$ 967	33
As Percentage of Personal Income	1.8%	2.3%	37
Percentage of Income, Sales and Property Taxes	20.1%	29.7%	41
Local Revenues Sources Only			
Percent from State Government	25.4%	33.0%	46
Percent from Property Tax	56.1%	29.4%	3

Rhode Island also ranks high in the percentage of state and local revenues generated from property taxes. It has traditionally relied more on local property taxes than most states. Fiscal year 2011 data placed the state 12th in total per capita state and local taxes, but 5th in state and local property taxes. The rankings are similar when the state and local property taxes are measured as percentages of personal income. The state ranks 6th in the share that property taxes contribute to total sales, income and property taxes.

The high rankings are also partially due to the relatively low percentage of state contributions to local budgets. State aid contributed 25.4 percent of FY 2011 local revenue sources in Rhode Island, the 46th lowest percentage in the United States. Nationally, states contributed an average of 33.0 percent.

Taxation of real and personal property is the principal sources of local government financing. The taxes are assessed and levied locally with exception of the property tax on public service corporations, which is levied at the state level and distributed by the Division of Taxation to local governments on an annual basis.

Until recently, Rhode Island local governments had no local option sales or income-based taxes. The 2003 General Assembly enacted legislation that has provided local meals and beverage and hotel tax revenues to the cities and towns where the transactions occur. However, the rates for these taxes are set at the state level, the taxes are collected by the Division of Taxation and are passed back to the

municipalities, and the revenues total approximately one percent of the total of local property tax revenues.

Beginning in the late 1990s, there were concerted efforts by the General Assembly to decrease reliance on the property tax as a source of state and local expenditures through increased general revenue sharing percentages, motor vehicle excise tax phase-out payments, and dedication of certain video lottery terminal proceeds.

State aid can be classified into *general* state aid and *restricted use* aid. *General* aid payments made to municipalities can be used for general budget use or as reimbursement for costs incurred. Examples include: general revenue sharing, payments in lieu of taxes, distressed communities relief, and vehicle excise tax phase-out payments. The general purpose of these programs is to relieve pressure on local property taxes by providing revenues from the state's broad based taxes to local governments

Restricted use aid includes payments made to a municipality for a specific purpose or payments to non-governmental entities providing a public service. These include library aid and police and fire incentive pay plan sharing. The largest source of restricted aid is education aid, which is not included here. Information concerning education aid is contained in *Rhode Island Education Aid* printed as a separate part of this book.

Summary of Local Aid Programs

The following section provides a brief description of current and prior state funded local aid programs. It is followed by more comprehensive descriptions of each source that include statutory references, legislative changes and funding histories. The appendices at the end of this report provide historical data by community and by fiscal year.

General. The Assembly provided \$60.5 million in FY 2014 and \$65.5 million in FY 2015 for general state aid to local governments.

Distressed Communities Relief Program. The Distressed Communities Relief program was established in 1990 to provide assistance to communities with the highest property tax burdens relative to the wealth of their taxpayers. The 2005 Assembly increased eligibility for FY 2006 to any community falling into the lowest 20.0 percent for at least three of four indices.

Appropriated funds are distributed based on the ratio of an eligible municipality's tax levy to the total tax levy of all eligible municipalities. However, when a new community qualifies, that community receives 50.0 percent of current law requirements the first year it qualifies. The remaining 50.0 percent shall be distributed to the other distressed communities proportionately. When a community falls out of the program, it receives a one-time transition payment of 50.0 percent of the prior year requirement exclusive of any reduction for first year qualification.

Payment in Lieu of Taxes (PILOT). This program reimburses cities and towns for property taxes which would have been due on real property owned by nonprofit educational institutions, nonprofit hospitals, or any state-owned hospital, veterans' residential facility or correctional facility, which is exempt from taxation by state law. Reimbursement is based on 27.0 percent of the tax that would have been collected if the property had been taxable, subject to appropriation.

Motor Vehicle Excise Tax Phase-Out. The 1998 General Assembly enacted legislation to eliminate the property tax on motor vehicles and trailers over a period of seven years. It was modified in subsequent legislative sessions to substantially extend the phase-out period. The exemption is a reduction in the assessed value subject to taxation. Cities and towns are paid by the state for the lost taxes due to the exemptions.

It began with a \$1,500 exemption for FY 2000 tax bills. Cities and towns were held harmless for the exemptions and were reimbursed on the basis of 100 percent collections. They also received adjustments for freezing tax rates at the FY 1998 level through FY 2003. Fire districts may no longer levy motor vehicle excise taxes, and they are fully reimbursed for the lost revenues.

The 2008 Assembly adopted Governor Carcieri's recommendation to maintain the exemption at \$6,000 for FY 2008 and FY 2009, and to permanently reduce the Motor

Vehicle Excise Tax reimbursements to 98.0 percent of the calculated value beginning with FY 2008.

Governor Carcieri included legislation in his FY 2010 revised budget to eliminate the third and the fourth quarter reimbursements to municipalities. The legislation subjects future exemptions to the annual appropriations act for FY 2011 and thereafter.

The 2010 Assembly provided \$117.2 million to fund the program at 88.0 percent of the amount that would have been due in FY 2010. It also enacted legislation that mandates a \$500 exemption for which the state will reimburse municipalities an amount subject to appropriation for FY 2011 and thereafter. It has been funded at \$10.0 million since. Municipalities may provide an additional exemption; however, that additional exemption is not subject to reimbursement.

Municipal Incentive Aid. The 2013 Assembly provided \$5.0 million for a new Municipal Incentive Aid program proposed by Governor Chafee to encourage sustainable funding of retirement plans and to reduce unfunded liabilities. For FY 2014, a municipality could become eligible for funding three way: if it had no locally administrated pension plan; if it had submitted an approved Funding Improvement Plan, if one was required, no later than June 1, 2013; or if its locally administered plan was not required to submit a Funding Improvement Plan. If a municipality is ineligible to receive aid, its share will be distributed to other municipalities according to their share of total state population.

The 2014 Assembly provided \$5.0 million for FY 2015 and revised the statute to allow a non-compliant municipality's allocation to be reappropriated to the following fiscal year, to provide an opportunity for compliance.

General Revenue Sharing. Beginning in FY 1994, a portion of total state tax revenues from the second prior fiscal year have been earmarked as state aid to cities and towns and distributed based on per capita income and local tax burdens for public purposes. In the FY 1999 budget, the General Assembly began increasing the percentage of revenues dedicated to the General Revenue Sharing program as a mechanism for reimbursing municipalities for lost local revenues from the ten-year phase-out of the inventory tax.

The 2005 Assembly provided that 6.25 percent of the *state share* of video lottery net terminal income solely attributable to new machines at Lincoln and Newport be dedicated to the program, up to a maximum of \$10.0 million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year. The 2006 Assembly converted that dedication to 0.10 percent of *all* net terminal income up to a maximum of \$10.0 million to non-distressed communities.

The 2009 Assembly adopted Governor Carcieri's recommendation to subject the program permanently to appropriation. It has not been funded since FY 2009.

Restricted Use. The Assembly provided \$11.6 million in FY 2014 and \$11.8 million in FY 2015 for restricted use aid to local governments.

State Support for Public Libraries. State law requires that the state provide financial support to public libraries. This includes an amount equal to 25.0 percent of second prior fiscal year local expenditures for library services as grants-in-aid. The same requirement applies to institutional libraries. Additionally, the state is required to fund 100 percent of the administrative and operating costs of the Rhode Island Library Network.

Library Construction Aid. The Rhode Island General Laws establish a library construction aid program, which is administered by the Office of Library and Information Services. The statute provides the authority to make grants-in-aid to a municipality or a free public library for the construction or capital improvements of any free public library designed to provide better services to the public.

Municipal Police Incentive Pay. The Rhode Island General Laws establish the Municipal Police Incentive Pay program. The purpose is to provide financial compensation to members of the state, city and town police departments, sheriffs and deputy sheriffs, members of the Rhode Island marshals' unit, Rhode Island capitol police, park police and conservation officers of the Division of Enforcement in the Department of Environmental Management, and the state fire marshal and deputy fire marshals who have earned college credits in the field of police work.

The amount of the incentive is based on a point system, which is related to the individual's level of educational attainment. Payments are made by the state directly to the municipalities, which, in turn, make payments to the participants in the program.

As part of the FY 2009 budget, Governor Carcieri proposed legislation to eliminate this program. The Assembly maintained the program in the general laws; however, no funding has been provided since.

Municipal Firefighters Incentive Pay. The Rhode Island General Laws establish a Municipal Firefighters Incentive Pay program. The purpose of this program is to provide financial compensation to members of the municipal fire departments and fire districts, the Cumberland Rescue Department and emergency service technicians of the Town of Lincoln who have furthered their education at the college level.

The amount of the incentive is based on a point system, which is related to the individual's level of educational attainment. Payments are made by the state directly to the municipalities, which, in turn, make payments to the participants in the program.

As part of his FY 2009 budget, Governor Carcieri proposed legislation to eliminate this program. The Assembly maintained the program in the general laws; however, has provided no funding since.

Property Revaluation Reimbursement. The Rhode Island General Laws require that municipalities update property valuations using statistical techniques every third and sixth year following a full revaluation. For the first statistical update, the state will reimburse municipalities for 100 percent of costs (up to \$20 per parcel). The level of reimbursement is reduced with each subsequent update, as prescribed in statute. The Assembly provided \$0.5 million for FY 2014 and \$0.6 million for FY 2015 to reimburse communities conducting property valuation updates.

Actuarial Valuations. Pension legislation adopted by the 2011 Assembly requires municipalities administering local plans to complete actuarial reviews and to submit them to the study commission, with the state reimbursing communities for half the cost. Governor Chafee included legislation in Article 26 of 2012-H 7323, clarifying that the state will reimburse municipalities for half of the cost of the actuarial valuations that are due on April 1, 2012. Subsequent annual actuarial valuations will not be reimbursed by the state.

Oversight Reimbursement. The 2013 Assembly enacted legislation requiring municipalities, sufficiently improved in financial standing so as to no longer require a budget commission or receiver, appoint an executive officer to act as a chief financial administrator. The state is required to reimburse half the cost of the advisors. For FY 2014 and FY 2015, Central Falls and East Providence were required to contract a financial officer. The 2014 Assembly provided \$0.1 million in total funding for each year.

Toll Reimbursement. The Rhode Island General Laws allow for members of the Newport and Jamestown fire and police departments and rescue personnel to be reimbursed for the cost of tolls on the Newport Bridge when using the bridge in the course of duty. The individuals are to be reimbursed by the municipality and the municipality reimbursed by the state.

State Mandates. The Rhode Island General Laws require that the Department of Administration submit to the Budget Office a report by municipality of the costs of mandates established since January 1, 1979, to be reimbursed in the next fiscal year. The statute also required that the Budget Office annually include the statewide total of reimbursements for the next fiscal year in the annual budget.

The 2008 Assembly adopted Governor Carcieri's recommendation to require that the Budget Office forward the costs for unfunded mandates to the Governor for consideration. Additionally, the state treasurer would reimburse the communities if a general appropriation is made by the General Assembly.

Public Service Corporation Tax. The tangible personal property of telegraph, cable, and telecommunications corporations and express corporations used exclusively in conducting business for the corporation is exempt from local taxation, but is subject to taxation by the state. Tangible personal property includes lines, cables, ducts, pipes,

machines and machinery, and equipment. The state passes the collections through to the local governments.

The 2009 Assembly enacted legislation to freeze the tax rate at the FY 2008 level.

Local Meals and Beverage Tax. The 2003 Assembly enacted a one percent additional tax or gross receipt from the sale of food and beverages sold in or at eating and drinking establishments. The tax is collected by the Division of Taxation and distributed back to the city and town which the meals and beverages were delivered. They totaled approximately \$21.4 million in FY 2013; they are not included in the totals of this publication.

Local Hotel Tax. The 2004 Assembly enacted a one percent additional tax or transient guest tax receipt, effective January 1, 2005, that is collected by the Division of Taxation and distributed to the city or town where the occupancy occurred (except for Newport, which collects and retains the one percent). They totaled approximately \$3.0 million in FY 2013; they are not included in the totals of this publication.

Distressed Communities Relief Program

Statute: Rhode Island General Laws: Section 45-13-12 (Distressed Communities Relief Fund); Chapter 44-25 (Real Estate Conveyance Tax); Section 42-61.2-7 (Division of Revenue from Video Lottery Terminals).

Background: The Distressed Communities Relief program was established in 1990 to provide assistance to the communities with the highest property tax burdens relative to the wealth of the taxpayers. Section 45-13-12 of the General Laws establishes the four indices used to determine eligibility. These indices are: percent of tax levy to full value of property, per capita income, percent of personal income to full value of property, and per capita full value of property. Effective FY 2006, any community falling into the lowest 20.0 percent (bottom eight rankings) for at least three of the four indices is eligible for assistance under the program.

The 2005 Assembly also mandated that when a new community qualifies, that community receives 50.0 percent of current law requirements the first year it qualifies. The remaining 50.0 percent is distributed to the other distressed communities proportionately. When a community falls out of the program, it receives a one-time transition payment of 50.0 percent of the prior year's full funding.

Funds are distributed based on the ratio of an eligible municipality's tax levy to the total tax levy of all eligible municipalities. Since the inception of the program, only nine communities have received funding through this program. The communities are Burrillville, Central Falls, Cranston, East Providence, North Providence, Pawtucket, Providence, West Warwick, and Woonsocket. For FY 2013, Cranston qualified for distressed aid and East Providence disqualified. The data and calculations for FY 2015 are shown in Appendix VI.

Significant Legislative Amendments: During the 1992 Session, the General Assembly passed legislation authorizing the State Lottery Commission to operate video lottery terminals. Section 42-61.2-7 of the Rhode Island General Laws dedicates a portion of the net terminal income to the Distressed Communities Relief program. In FY 1993, the contributions to the program would come from the share of the net terminal income due the retailers, kennel owners and technology providers. Beginning in FY 1994, the first \$5.0 million from the state's share of net terminal income would be dedicated to the program.

The 1993 Assembly amended the statute so that \$3.0 million would be from the state's share of net terminal income in FY 1994 with the remaining \$2.0 million split as follows: \$1,152,683 from the retailers, \$218,579 from the kennel owners, and \$628,737 from the technology provider. The kennel owners' share was eventually eliminated, and the 2005 Assembly made a technical correction to dedicate \$5.0 million from general revenue collections to the program.

The 2004 Assembly agreed with Governor Carcieri's budget proposal to eliminate the link between the real estate conveyance tax and the program for FY 2004 and FY 2005 only. The real estate conveyance tax is \$2.00 per \$500 paid for the purchase of property (including the value of any lien or encumbrance remaining at the time of sale), with \$0.30 dedicated to the Distressed Communities program. Of the remainder, \$0.60 goes to state general revenues for state use and the remaining \$1.10 stays with the community where the tax was collected. For FY 2004 and FY 2005, only the \$0.30 dedicated share of the real estate conveyance tax would be transferred to the state general fund. Thereafter, beginning in FY 2006, the program reverted back to usage of dedicated funding from the real estate conveyance tax. The Assembly included funding for FY 2005 of \$8.5 million, \$1.0 million more than Governor Carcieri's recommendation.

In his FY 2005 revised and FY 2006 budget recommendations, Governor Carcieri recommended level funding the program at \$8.5million, which included \$1.4 million less for FY 2006 than required under current law, based on the November 2004 Revenue Conference estimates. He recommended amending the law to make the amount permanently subject to appropriation.

The Assembly did not concur and added \$1.0 million from general revenues above the Governor's FY 2005 revised recommendation to fully fund the program at current law requirements. In prior years, payments were made to distressed communities in April and in August, over two separate budget cycles. The 2004 Assembly changed the payment cycle. It moved to a September and April payment schedule, both within the same state fiscal year. The state had inadvertently omitted the August payment, which was always a receivable to the communities and a payable by the state. This corrected the oversight and provided the \$1.0 million to make program payments current.

The Assembly provided \$10.0 million for the program for FY 2006. The 2005 Assembly changed the distribution of program funds in Article 11 of 2005-H 5270, Substitute A by amending the law to allow communities to qualify as distressed if they fall into the lowest 20.0 percent for at least three of the four indices used to determine eligibility, or the eight lowest ranked communities. Prior to this change, communities qualified if they fell into the lowest 15.0 percent for at least three of the four indices used to determine eligibility, or the six lowest ranked communities.

The 2005 Assembly provided that 12.5 percent of the state share of video lottery net terminal income solely attributable to new machines at Lincoln and Newport up to a maximum of \$20.0 million per year be dedicated to the program.

The 2005 Assembly also mandated that when a new community qualifies, that community receives 50.0 percent of current law requirements the first year it qualifies. The remaining 50.0 percent is distributed to the other distressed communities proportionately. When a community falls out of the program, it receives a one-time transition payment of 50.0 percent of the prior year's full funding.

The 2006 Assembly converted the dedication of new lottery revenues to 0.19 percent of *all* net terminal income up to \$20.0 million per year; the 12.5 percent new machine revenue. The conversion was neutral, that is, the same amounts were achieved.

The 2007 Assembly concurred with Governor Carcieri's proposal to fund FY 2008 aid at the FY 2007 entitlement, or \$10.4 million total. The 2007 Assembly also concurred with the Governor's proposal to convert this to a general revenue appropriation.

The 2008 Assembly concurred with Governor Carcieri's proposal to freeze the amount of dedicated video lottery revenues at the FY 2008 level and provided \$10.4 million. This is \$144,532 less from the video lottery revenues because of the freeze. Communities' aid distribution for FY 2009 was based on updated qualifying tax levies.

Prior to FY 2013, the state made two payments each year to communities, one in March and one in August. The 2012 Assembly adopted legislation allowing municipalities to receive all of their distressed aid payments in August.

Funding: Funding for the Distressed Communities Relief Fund was initially from two sources of revenues: the real estate conveyance tax and video lottery terminal revenues. The 2009 Assembly funded the program solely with general revenues. Funding has totaled \$10.4 million since FY 2008.

Governor Carcieri's FY 2010 recommended budget included \$10.4 million for FY 2010, consistent with the enacted budget. He recommended using \$10.0 million of the total \$30.0 million available from the flexible portion of the federal stabilization funds in lieu of general revenues. Communities' aid distribution for FY 2010 was based on updated qualifying tax levies and assumed all aid is distributed using the same method. Aid from video lottery terminal resources are shared equally unlike the weighted allocation of the majority of the funds.

The Assembly did not concur with the proposal to fund the program with stimulus funds; it provided \$10.4 million from general revenues. It also enacted legislation to subject the video lottery terminal funding to appropriation and clarified how much of the appropriation will be distributed equally to each qualifying distressed community.

Funding for the program has been \$10.4 million each fiscal year from FY 2008 through FY 2015. In his revised FY 2011 budget, Governor Chafee recommended providing a supplemental appropriation of \$5.2 million, increasing the FY 2011 total to \$15.6 million. His FY 2012 budget included resumption of funding at the \$10.4 million level. The Assembly provided \$10.4 million for both years.

Governor Chafee included a supplemental appropriation of \$5.0 million for FY 2013 in his revised budget and included \$15.4 million for FY 2014. The 2013 Assembly did not concur; it provided the enacted amount for both years. The 2014 Assembly also provided \$10.4 million for FY 2015, consistent with the Governor's recommendation.

The following graph shows the total annual appropriation for this program from FY 1991 through FY 2015. See *Appendix II* of this publication for program payments distributed by municipality for each fiscal year.

**Distressed Communities Relief Program
(in millions)**

While FY 1994 was the first year receipts from net terminal income were dedicated to the program, full payment was not made due to a lawsuit regarding the distribution of funding. The disputed portion of the FY 1994 payment was made in FY 1995.

Payment in Lieu of Taxes (PILOT)

Statute: Rhode Island General Laws: Section 45-13-5.1

Background: The Payment in Lieu of Taxes (PILOT) program reimburses cities and towns for property taxes which would have been due on real property owned by nonprofit educational institutions, nonprofit hospitals, or any state-owned hospital, veterans' residential facility or correctional facility, which is exempt from taxation by state law. Reimbursement is based on 27.0 percent of the tax that would have been collected if the property had been taxable, subject to appropriation. If the appropriation is less than the amount necessary to reimburse at 27.0 percent, the reimbursements are ratably reduced. The state makes one payment to communities in July of each year.

Significant Legislative Amendments: The General Assembly established the PILOT program in 1986 to provide payments in lieu of taxes for private nonprofit institutions of higher education and nonprofit hospital facilities. The rate of reimbursement was set at 25.0 percent of taxes that would have been collected if the property had been taxable. The statute required that payment be made no later than the third month of the fiscal year. The assessment reference date was the assessment immediately preceding the fiscal year in which the payment would be made.

Session	Action	Percent
1986	Program established	25.0
1987	Changed assessment date; Budget Office must include payments in budget effective FY 1989	25.0
1988	Expanded type of eligible institutions	25.0
1997	Increased reimbursement effective FY 1998	27.0
2014	Required assessment data submission prior to receipt of current year payment	27.0

The General Assembly amended the statute in 1987 to change the assessment reference date to the preceding December 31, to require the Budget Office to include funding for the PILOT payments in the state budget beginning in FY 1989, and to require payment by July 31 of each fiscal year, which allowed municipalities to record the revenues as a receivable in the fiscal year ending the prior June 30. Assessment data for the following fiscal year's payment is due August 1.

The 1988 Assembly expanded eligible institutions to include state-owned or operated hospitals, veterans' residential facilities, or correctional facilities occupied by more than 100 residents. This is the only expansion of eligibility since the program's inception. A minor amendment to the law in 1989 changed the assessment reference to the succeeding local assessment date, not necessarily December 31.

The 1997 Assembly increased the rate of reimbursement to municipalities from 25.0 to 27.0 percent of taxes that would have been collected effective FY 1998.

The 2002 Assembly amended the law to allow a ratably reduction in payments to the appropriation.

The 2014 Assembly enacted changes to encourage municipalities to submit assessment data by the August 1 deadline and to assist the Division of Municipal Finance in prompt data collection. Municipalities will be required to submit tax assessment data for the program for the following fiscal year, prior to receiving the current fiscal year's payment. The change is effective July 1, 2015; it did not impact the July 2014 payment.

Funding: Funds were not appropriated for the current PILOT program in FY 1990. For the period from FY 1991 to FY 1995, funding for the PILOT program ranged between \$2.8 million and \$3.5 million. In FY 1995, appropriations were increased to \$12.2 million to fully fund the program at 25.0 percent of taxes that would have been due. This required an increase of \$9.4 million over the FY 1994 budget.

Governor Almond recommended eliminating the program in his FY 1996 budget. However, the Assembly did not concur and fully funded the program.

In FY 1998, the rate of reimbursement was increased to 27.0 percent. The program was fully funded from FY 1999 through FY 2002.

For FY 2003, Governor Almond recommended and the Assembly appropriated \$18.2 million, which was approximately 24.8 percent of the amount that would have been due from the exempt properties. The program was fully funded at 27.0 percent for FY 2004 at \$21.7 million. For FY 2005, the Assembly added \$1.0 million to the Governor's recommendation and funded the program at \$22.7 million, 26.3 percent of what would have been collected from the tax exempt institutions.

For FY 2006 the Assembly added \$4.3 million to Governor Caracieri's recommendation to fully fund the program at \$27.0 million, 27.0 percent of the property taxes which would have been collected.

For FY 2007, Governor Carcieri recommended \$29.0 million to fully fund the program and included T.F. Green Airport as a qualifying property, with payments phased in over two years, including \$1.2 million for FY 2007. The Assembly enacted \$27.8 million, did not concur with the inclusion of T.F. Green Airport, and fully funded the existing program at 27.0 percent of forgone property taxes.

Since FY 2007, the Assembly has provided \$1.0 million annually so that the Rhode Island Airport Corporation can provide impact aid payments to the six state airports that shall be passed through to communities that host the airports. This is a separate award and not part of the Payment in Lieu of Taxes program. Sixty percent of the appropriated funds are to be distributed to each airport serving more than one million passengers based upon its percentage of the total number of passengers served.

The remaining 40.0 percent was distributed to the six airports based on the shares of total take-offs and landings during calendar year 2005. Each airport shall make payment to the cities or towns in which any part of the airport is located within 30 days

of receipt of payment from the Corporation, and each community shall receive at least \$25,000.

The 2014 Assembly provided \$40.1 million for FY 2015, which represents a reimbursement of 25.4 percent of the value.

The following table shows the percentage of reimbursement from FY 2008 through FY 2015.

Fiscal Year	PILOT Full Funding	Actual Payments	Percent Reimbursement
FY 2015	\$ 42,536,844	\$ 40,080,409	25.4%
FY 2014	42,978,302	35,080,409	22.1%
FY 2013	41,709,809	35,080,409	22.7%
FY 2012	38,202,025	33,080,409	23.4%
FY 2011	35,274,503	27,580,409	21.1%
FY 2010	31,140,576	27,580,409	23.9%
FY 2009	29,764,498	27,580,409	25.2%
FY 2008	27,816,763	27,766,967	27.0%

The following graph shows the total annual appropriation for this program from FY 1990 through FY 2015. See *Appendix II* of this publication for program payments distributed by municipality for each fiscal year.

**Payment in Lieu of Tax Exempt Properties
(in millions)**

Payment in Lieu of Taxes (PILOT) for Railroad Corporations

Statute: Rhode Island General Laws: Chapter 44-13.1

Background: Section 44-13.1-1 of the Rhode Island General Laws exempted railroad corporations from certain state taxes and local property taxes. The types of property exempt from local taxation under the statute included the following: rights of way, sidings, yard tracks, branches and spurs and the land under these improvements; vehicles, equipment, rolling stock and locomotives used for railroad purposes; and various types of buildings on railroad corporation property.

Municipalities were required to calculate the amount of taxes that would have been due. This data was submitted to the Budget Office for inclusion in the state budget. The railroad corporations were required to pay this amount to the state, which then distributed the funds as aid to municipalities.

During the 1985 Session, the General Assembly enacted a four-year phase out of the railroad corporations' payments in lieu of taxes beginning in FY 1996, at 25.0 percent per year. This also eliminated the payments made to the municipalities.

Funding: Final payments for the PILOT program from railroad corporations were made in FY 1990. The final payment totaled \$271,351.

Motor Vehicle Excise Tax Phase-Out

Statute: Rhode Island General Laws: Title 44, Chapter 34.1; Section 42-61.2-7

Background: The 1998 General Assembly enacted legislation to phase out the property tax on motor vehicles and trailers. The exemption is a reduction in the assessed value subject to taxation. The Vehicle Value Commission sets the assessed values of vehicles using data from the National Automobile Dealers Association (NADA). Cities and towns are paid by the state for the lost taxes due to the exemptions. In addition, local tax rates on vehicles are frozen to the FY 1998 level. Annually, the state makes four quarterly payments to the communities in the months of August, November, February and May.

Significant Legislative Amendments: The 1998 General Assembly enacted legislation to phase out the property tax on motor vehicles and trailers beginning with FY 2000 tax bills and ending in FY 2006, when the tax would be totally eliminated. The 2000 Assembly amended the statute to extend the phase-out for one year through FY 2007; the 2002 Assembly amended it further to provide for a permanent \$4,500 exemption for FY 2003 and beyond. The phase-out was reinstated for FY 2006 with increased exemptions tied to new video lottery terminal income. For FY 2007, the exemption was \$6,000.

The Vehicle Value Commission sets the assessed values of vehicles using data from the National Automobile Dealers Association (NADA) beginning with assessments for FY 2000. Prior to FY 2000, a Rhode Island sales adjustment was applied to many vehicles, which had the impact of altering the average retail value used for tax purposes. This method produced wide variations and inequities from year to year. The sales adjustment is no longer being used, which had the impact of increasing the values of some vehicles for FY 2000 tax purposes. Taxpayers were held harmless from the increases due to the change, paying FY 2000 taxes equal to FY 1999 payments.

The 1998 legislation froze local tax rates at FY 1998 levels, but provided for annual adjustments to the rates for purposes of reimbursing cities and towns for that freeze. The legislation used the consumer price index-all urban consumers as a surrogate for the amounts rates would have increased. The 2003 Assembly adopted Governor Carcieri's recommendation to end these adjustments beginning in FY 2004.

Governor Almond proposed to the 2000 and 2001 Sessions of the General Assembly that the exemption be frozen at \$2,500. The Assembly did not concur in either year. He proposed freezing it at \$3,500 to the 2002 Assembly for both FY 2002 (retroactively) and FY 2003. The 2002 Assembly adopted a permanent exemption of \$4,500 for FY 2003 and beyond.

The 1998 legislation required reimbursement to cities and towns from the state for the lost taxes due to the exemptions and, as noted above, the frozen rates. Reimbursements were made on the basis of the entire local tax bases, assuming collection history of 100

percent, which rarely occurs, if ever. Prior to FY 2003, the reimbursements were made one year in advance, and then reconciled on final payment. The initial legislation specified that when the tax was eliminated, cities and towns would receive permanent shares of a dedicated percentage of the sales tax.

The 2000 Assembly eliminated the authority of fire districts to levy motor vehicle excise taxes. The fire districts would be reimbursed for 100 percent of the lost revenues beginning in FY 2001. This was enacted as part of Article 19 of the FY 2000 Appropriations Act. Sufficient funds were appropriated to cover the costs of this action. The Assembly then eliminated the ability of municipalities to charge a minimum tax beginning in FY 2002. Section 44-34-2 of the General Laws established a minimum tax of \$5.

The 2002 Assembly amended the payment schedule to four installments during the fiscal year on August 20th, November 20th, February 20th, and May 20th, beginning in FY 2003. In prior years, the first and second payments were made on October 20th and February 20th of each year equal to 25.0 percent of the estimated reimbursement. The third payment was made on June 20th of each year equal to the remaining 50.0 percent of the estimated reimbursement.

Governor Carcieri included legislation in his FY 2010 revised budget to eliminate the third and the fourth quarter reimbursements to municipalities. The proposed legislation would allow municipalities to levy a supplemental tax to capture the loss of the reimbursement for FY 2010 subject to property tax cap laws. For FY 2011 and thereafter, the future exemptions would be subject to the annual appropriations.

The 2010 Assembly had not taken action on the Governor's budget and the third quarter payment, which was due on February 1, was made. The Assembly provided an additional \$16.4 million, for total funding of \$117.2 million to fund the program at 88.0 percent of the amount that would have been due in FY 2010.

The 2010 Assembly restored the authority for fire districts to levy a motor vehicle excise tax. The Assembly changed the exemption amount from \$6,000 to \$500, and allowed municipalities to provide an additional amount above \$500; however, that additional amount would not be subject to reimbursement. It also removed the provision that restricted municipalities from taxing the difference in the event that the value of a vehicle is higher than the prior fiscal year. It also allowed for rates to be lowered from levels at which they were frozen.

Current law requires that the Vehicle Value Commission adopt by rule a methodology for determining the presumptive value of motor vehicles subject to state excise tax. The Commission sets the value at 100 percent of the average retail price of similarly used vehicles of the same make, model, type, and year of manufacture as reported by the National Automobile Dealers Association. Legislation introduced in the 2014 and prior sessions proposed, among other things, changing the value used for assessments to the trade-in value.

The Division of Municipal Finance reports that the average retail price for a vehicle is typically about 30 percent more than its average trade-in value. A change in the value from retail to trade-in for assessment purposes would have an adverse impact on local revenues, absent additional revisions, as current law prohibits municipalities from increasing rates above 1998/1999 levels. This means they cannot make up any shortfalls resulting from decreased tax assessments on the newly lower-valued vehicles.

Funding: Reimbursements are funded from annual general revenue appropriations. The reimbursement amount for each municipality or fire district is determined by the amount of foregone motor vehicle excise tax revenue, as reported to the Division of Municipal Finance on an annual basis.

The 1998 Assembly enacted the phase-out of motor vehicle and trailer excise taxes as part of the FY 1999 Appropriations Act. Advance reimbursements to municipalities began that year, with total reimbursements of \$22.1 million.

The 2002 Assembly did not concur with Governor Almond's recommendation to reduce the FY 2002 aid to cities and towns, instead appropriating funds for an advance reimbursement for FY 2002 and the FY 2003 exemption level of \$4,500. Appropriations for FY 2004 did not contain additional inflation adjustments, and reflected changes only for estimated value changes.

Governor Carcieri recommended that state reimbursement of lost excise tax revenues to cities and towns be based upon the prior local fiscal year vehicle values. The change in reimbursement from a concurrent to a prior local fiscal year basis would begin in FY 2005. The Assembly concurred.

Governor Carcieri recommended full funding of \$105.0 million for the \$4,500 exemption for FY 2006. His recommended budget included legislation ending the eventual repeal of the tax. The 2005 Assembly did not concur and added \$7.3 million from general revenues to increase the vehicle value exemption from \$4,500 to \$5,000 per vehicle. The Assembly also passed Article 17 of 2005-H 5270, Substitute A, allowing advance reimbursements to communities based on current year property values rather than prior local fiscal year values.

The 2005 Assembly also enacted legislation to end the car tax by annually increasing the exemption amount in \$500 increments until its end. This would be funded through the dedication of 78.125 percent of the state share of video lottery net terminal income from new machines at Lincoln and Newport, up to a maximum of \$10.0 million per year.

Governor Carcieri recommended \$129.1 million for FY 2007 to fund a \$5,500 exemption, based on the revenues from new video lottery terminals dedicated to the program. It was estimated that the additional \$500 exemption would require \$7.5 million; the new machine revenue was estimated at \$6.1 million for FY 2007. The Governor recommended supplementing the machine revenues with general revenues.

The 2006 Assembly included \$136.0 million to reimburse communities for a \$6,000 exemption for FY 2007. The appropriation represented a \$1,000 increase in the exemption amount, compared to FY 2006, which was \$23.7 million more than enacted, and \$6.9 million more than the Governor recommended. The 2006 Assembly also converted the dedicated funding to 1.22 percent of all net terminal income up to \$10.0 million per year. It additionally established that the amount of the vehicle value exemption increase to the nearest \$250 increment, and the amount could not be less than the prior year's exemption. The conversion was neutral.

For FY 2008, Governor Carcieri recommended \$140.6 million to maintain the car tax phase-out at \$6,000. The 2007 Assembly provided \$135.5 million for FY 2008, based on updated data. The appropriation maintained the tax rate freeze and provision for annual increases in the limit based on increases in video lottery terminal proceeds.

The 2008 Assembly adopted the Governor's proposal to permanently reduce the Motor Vehicles Excise Tax reimbursements to 98.0 percent of the calculated reimbursement, effective for FY 2008. Municipalities were required to provide vehicle owners the \$6,000 exemption; however, they would effectively be reimbursed \$5,880 for each vehicle. This established reimbursements more in line with collection rates. The Assembly provided \$135.3 million for FY 2008 and \$139.6 million for FY 2009.

Governor Carcieri recommended \$135.4 million, \$4.2 million less than enacted for FY 2009, in his revised FY 2009 recommendation, reflective of updated data. The growth rate from FY 2008 to FY 2009 was 0.1 percent. The FY 2009 enacted budget had assumed a growth rate of 3.2 percent. The Governor included \$135.3 million for FY 2010 and maintained the \$6,000 exemption; however, no growth was assumed between FY 2009 and FY 2010. The Assembly concurred.

In his FY 2010 revised budget, Governor Carcieri included legislation to eliminate the third and fourth quarter reimbursements to municipalities and allow municipalities to levy a supplemental tax to recapture the lost revenue, following certification by the Department of Revenue. The levying of a supplemental tax requires an affirmative vote of at least four-fifths of the full membership of the municipality's governing body. For FY 2011 and thereafter, the legislation subjects future exemptions to the annual appropriations act.

The Assembly had not taken action on the Governor's budget prior to the February 1 third quarter payment; therefore, the payment was made. The Assembly provided an additional \$16.4 million, for total funding of \$117.2 million, to fund the program at 88.0 percent of the amount that would have been due in FY 2010.

The 2010 Assembly also enacted legislation mandating a \$500 exemption for which the state will reimburse municipalities an amount subject to appropriation for FY 2011 and thereafter. It provided \$10.0 million for FY 2011. The legislation allows municipalities to provide an additional exemption, but it is not subject to reimbursement. The Assembly eliminated the provision that restricted municipalities

from taxing the difference in the event that the value of a vehicle is higher than the prior fiscal year and restored the authority for fire districts to levy a motor vehicle excise tax for fiscal year 2011 and thereafter. It also allowed rates to be lowered from the existing frozen levels; rates still cannot be raised above the frozen levels.

The Assembly provided \$10.0 million for FY 2011, but did not provide funding for fire districts beyond FY 2010. It restored the authority for fire districts to levy a motor vehicle excise tax for fiscal year 2011 and thereafter.

The program has been funded at \$10.0 million since FY 2011.

The following graph shows the total annual appropriation for this program from FY 1999 through FY 2015. See *Appendix II* of this publication for program payments distributed by municipality for each fiscal year.

**Motor Vehicle Excise Tax Phase-Out

**Scituate's fiscal year is April 1 to March 31.

Municipal Incentive Aid

Statute: Rhode Island General Laws: Chapter 44-13.2

Background: Section 44-13.2-1 of the Rhode Island General Laws establishes an aid program for municipalities to encourage sustainable funding of retirement plans and to reduce unfunded liabilities by providing additional state aid to municipalities that comply with certain benchmarks for locally administered plans and to municipalities in the Municipal Employees' Retirement System. The intent of the program is to encourage pension sustainability; however, the program does not require the aid go toward funding pension plans. The state makes one payment to municipalities in March of each year.

To receive aid, municipalities must meet certain benchmarks for each program year. For FY 2014, a municipality could receive funds if it had no locally administered pension plan; if it submitted an approved Funding Improvement Plan by June 1, 2013, or if its locally administered plan was not required to submit a Funding Improvement Plan. For FY 2015 and FY 2016, a municipality qualifies for the program if its pension plan is in the state-administered Municipal Employee Retirement System; if it has submitted or implemented an approved Funding Improvement Plan within 18 months of critical status notification; or, if it is not required to submit a Funding Improvement Plan and is making 100 percent of its Annually Required Contribution.

Aid is distributed on the basis of the most recent estimate of population of each municipality as a share of the total state population, as reported by the Bureau of the Census. Payments are made in March of each year. If a municipality is not eligible to receive aid, its share would be redistributed to the eligible cities and towns.

Significant Legislative Amendments: In his FY 2014 recommended budget, Governor Chafee included legislation to establish a state aid program that encourages sustainable funding of municipal retirement plans and reduction of unfunded liabilities. The proposal included legislation requiring the Governor recommend funding of \$10.0 million for the program each fiscal year from FY 2014 through FY 2016, though funding remains subject to appropriation.

As of June 30, 2011, the available valuation at the time of the program's enactment, the Municipal Employee Retirement System had a funding ratio of 84.3 percent, with an unfunded liability of \$224.1 million for 14,895 members. The state Auditor General reported that 24 of the 36 locally-administered plans were at risk with a collective funded ratio of 40 percent.

The 2014 Assembly enacted changes to the program, requiring a municipality make only the required funding payment established in its Funding Improvement Plan, reducing the amount included in Governor Chafee's recommended budget from \$10.0 million to \$5.0 million for FY 2015 and FY 2016, and allowing a municipality's distribution to be reappropriated to the following fiscal year, if it failed to meet

eligibility requirements. To receive the prior and current years' share of aid, the municipality must meet the funding requirements for both years.

Funding: Payments are funded from annual general revenue appropriations. In his FY 2014 recommended budget, Governor Chafee included \$10.0 million to fund the Municipal Incentive Aid program; the 2013 Assembly provided \$5.0 million. Consistent with the Governor's recommendation, the 2014 Assembly provided \$5.0 million for FY 2015.

General Revenue Sharing Program

Statute: Rhode Island General Laws: Section 45-13-1; Section 42-61.2-7

Background: Beginning in FY 1994, one percent of total state tax revenues from the second prior fiscal year has been earmarked as state aid to cities and towns as general revenue sharing. The distribution formula, established in Section 45-13-1 of the Rhode Island General Laws, is based on per capita income and local tax effort excluding that for education expenses. Distribution is based upon the calculation of tax effort divided by income squared, designated as R in the general laws. Funds are first allocated between the counties of the state based on each county's ratio of R as compared to the calculation of R for the state as a whole. Then, within each county, the funds are allocated between the cities and towns based on these same formula and ratio comparisons. The data and calculations for FY 2009 are contained in Appendix VIII.

The 1998 General Assembly began increasing the percentage of second prior year revenues dedicated to the General Revenue Sharing program as a mechanism for advanced reimbursement to municipalities for lost local revenues from the ten-year phase-out of the inventory tax. The rates were frozen at 1999 levels and reduced annually in 10 percent increments. FY 2008 was scheduled to be the last year for this tax which would be 10 percent of the 1999 rate. The percentage of second prior year tax collections dedicated to the program was to increase on an annual basis through FY 2011 to a total of 4.7 percent. The 2007 Assembly concurred with Governor Carcieri to freeze the share at 3.0 percent beginning in FY 2009, but the 2009 Assembly subsequently adopted the Governor's recommendation to subject the program to appropriation. The 2005 Assembly also dedicated a portion of video lottery terminal income to be distributed as general revenue sharing aid. The state traditionally makes the formula payments to communities in March of each year although there is not a statutorily established date, and the supplemental payment from video lottery revenues at the end of June.

Significant Legislative Amendments: The State of Rhode Island has maintained a program of sharing state general revenues with municipalities since the late 1940s. Over time, sources of funding and mechanisms for distribution have changed.

In the mid-1980s, funding was derived from a specified percentage of combined sales and income tax receipts from the second prior fiscal year. In FY 1985, the amount was 1.2 percent of second prior fiscal year receipts. During the 1985 Session of the General Assembly, the percentage was increased to 2.0 percent for FY 1986 and all subsequent fiscal years. Funds were distributed based on the ratio of a municipality's tax levy to the total tax levy of all municipalities.

The 1987 General Assembly changed the program significantly. First, it changed the program amounts to 6.1 percent of combined sales and income tax revenues from a defined reference year as state aid, while repealing various other statutes shown in the table below that had previously provided assistance to municipalities.

RIGL	Topic
3-10-10	Disposition of Beverage Tax Proceeds
41-4-14	Tax on Pari-Mutuel Betting
44-5-38.1	Payment in Lieu of Tax/Personal Property Tax on Manufacturer's Machinery and Equipment
44-5-42.1	Payment in Lieu of Tax/Farm Equipment
45-13-4	Payment in Lieu of Tax/Intangible Personal Property Tax on Manufacturer's Inventory
45-13-5	Payment in Lieu of Tax/Local Personal Property Tax on Manufacturer's Inventory

Second, it provided that in FY 1988 no municipality would receive less than 110 percent of the combined amounts received in FY 1987 from the repealed statutes, the General Revenue Sharing program and Section 44-5-42, relating to the exemption of certain farm property from taxation. For FY 1989 and all subsequent fiscal years, the amount of aid distributed would be no more than 105 percent of the prior fiscal year's distribution.

Third, it changed the distribution to the ratio of each municipality's product of population, tax effort and income to the total product of these variables for all municipalities. Prior to that time, tax levy was the only variable considered in the distribution of funds.

That was subsequently amended by the 1988 Assembly to each city or town's ratio of the product of population, tax effort and income to the total product of these variables for cities or towns within a county area. The funds were distributed first by county based on the same type of calculation.

The 1991 Assembly repealed the existing General Revenue Sharing program and established a new program in its place. While the new program had the same distribution mechanism, the source of funding changed. The statute required distribution based on the amount included in the annual appropriations act. Beginning in FY 1994, one percent of second prior fiscal year total state tax revenues would be distributed as aid. This new program became effective for FY 1992.

The 1992 General Assembly clarified the statutes containing the 1988 distribution mechanism to the current formula.

The 2003 General Assembly modified the census data to phase in per capita personal income from the 2000 census over ten years beginning in FY 2004 with 10.0 percent of the 2000 census data and 90.0 percent of the 1990 census data. The percents are adjusted annually over ten years until full phase in of the 2000 census data. This was done to ease the shock of new census data every ten years, with the other variables changing annually.

The 2005 Assembly provided that 6.25 percent of the state share of video lottery net terminal income solely attributable to new machines at Lincoln and Newport be dedicated to the program, up to a maximum of \$10.0 million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

The 2006 Assembly converted the dedication of video lottery income from the state share of new machine income to 0.10 percent of the state's share all net terminal income up to a maximum of \$10.0 million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year. The conversion was neutral, that is, the same amounts were achieved.

The 2007 Assembly concurred with Governor Carcieri's proposal to freeze the share at 3.0 percent beginning in FY 2009.

The 2009 Assembly enacted legislation to subject the General Revenue Sharing program permanently to appropriation; delete the requirement for a distribution of 3.0 percent of second prior year state tax revenues for FY 2010 and each year thereafter. The legislation also deleted the two-third requirements for repealing or amending the statute relating to the apportionment of aid.

Funding: As the graph on page 29 illustrates, no appropriation was made for the General Revenue Sharing program in FY 1993. In that year, funding was statutorily based on amounts included in the appropriations act.

Since FY 1994, the state has appropriated funding as required by statute. For the period from FY 1994 through FY 1998, this total was one percent of second prior year tax revenues. Funding increased by \$6.0 million in FY 1999 to account for the first increment of the inventory tax phase-out.

Governor Almond recommended eliminating the program in his FY 1996 budget; the General Assembly did not concur and provided full funding. Governor Carcieri proposed freezing the amount for FY 2004 at the FY 2003 level and at 2.6 percent of reference year revenues thereafter; the Assembly did not concur and fully funded the program for FY 2004 and retained current law phase up to 4.7 percent in FY 2010.

For FY 2005, Governor Carcieri recommended \$51.4 million for general revenue sharing based on freezing general revenue sharing payments at the FY 2004 revised payment level for each community. He also recommended delaying the increase to 3.0 percent of the state's second prior tax collections until FY 2006 and the schedule of annual percentage increases by one year until it reaches 4.7 percent in FY 2011.

The Assembly concurred with the Governor, but added \$1.0 million for a total FY 2005 appropriation of \$52.4 million.

For FY 2006, Governor Carcieri recommended \$1.0 million more than FY 2005, \$53.4 million, and included freezing the amount at 3.0 percent of the second prior year's general tax revenues permanently, ending the phase up to 4.7 percent. His FY 2006 recommendation was \$11.9 million less than current law requirements. The Assembly did not concur and restored \$11.9 million from general revenues to fully fund the program at current law requirements with continued phase up to 4.7 percent of the second prior year's general tax revenues in FY 2011.

Governor Carcieri recommended funding the General Revenue Sharing program for FY 2007 at \$65.2 million, which is \$161,407 less than enacted and included \$487,500 from dedicated revenues from new video lottery terminals. The recommendation was fixed to the level of appropriation for FY 2007, \$16.1 million less than statutory requirements. The Governor also recommended freezing the amount at 3.0 percent of the second prior year's general tax revenues for FY 2008 and thereafter instead of the phase up to 4.7 percent in FY 2011 under current law.

The Assembly froze the program for FY 2007 and reinstated the phase up to 4.7 percent in FY 2011 as in current law. The Assembly included \$65.1 million for FY 2007 payments.

The 2007 Assembly concurred with Governor Carcieri's proposal to freeze communities' FY 2008 aid payments at the FY 2007 level by using older reference data, and fix future amounts at 3.0 percent of tax revenues, ending the phase-up.

The 2008 Assembly concurred with Governor Carcieri's recommendation for the FY 2008 revised budget, which provided a \$10.0 million proportional reduction in the original enacted aid to communities, for which the enacted budget included \$65.1 million to level fund communities at FY 2007 amounts.

For FY 2009, Governor Carcieri recommended \$55.0 million for the program. He included legislation contained in Article 15 of 2008-H 7390 to freeze the distribution of state share of video lottery terminal revenue at the FY 2008 enacted level. The recommendation reflects a ratable reduction of \$10.0 million and a further provision that includes a reduction of \$96,011 to assure that no community receives more aid in FY 2009 than the amount adopted for the FY 2008 enacted budget. This includes \$7,430 from East Greenwich, \$41,018 from East Providence, \$41,064 from Hopkinton, and \$6,499 from Little Compton. Communities' aid distributions would reflect updated data.

The 2008 Assembly provided \$55.1 million, or \$96,011 more than recommended and changed the reference year data used for the distribution for the formula to be the same as used for FY 2008 and FY 2009. This assured that each community would receive the same amount of aid in FY 2009 as they did in FY 2008.

Governor Carcieri's FY 2009 revised budget included suspending the state's payments to communities for that year. He subsequently submitted an amendment to restore

\$31.0 million from the state fiscal stabilization fund to fund the program. The \$31.0 million would be distributed through the existing formula; however, communities would be required to allocate a portion to school budgets based on the percent of support for the school budget that the community supplied in FY 2007. Communities that contributed less than 5.0 percent would be required to allocate 100.0 percent of the general revenue sharing allocation to the schools. Communities that contributed between 5.0 percent and 25.0 percent would be required to allocate 75.0 percent, communities that contributed between 25.0 percent and 50.0 percent would be required to allocate 50.0 percent, and communities that contributed more than 50.0 percent would be required to allocate 25.0 percent to school budgets.

The Assembly did not concur and provided \$25.0 million to fund the program in FY 2009, distributed proportionally on the same basis as the original enactment.

The FY 2010 budget did not include any funding for the General Revenue Sharing program, consistent with Governor Carcieri’s recommendation. The Assembly enacted legislation to subject the program permanently to appropriation; deleted the requirement for a distribution of 3.0 percent of second prior year state tax revenues for FY 2010 and each year thereafter, and deleted the two-thirds requirement for repealing or amending the statute relating to the apportionment of aid. No funding has been provided since.

The following graph shows the total annual appropriation for this program from FY 1987 through FY 2015.

General Revenue Sharing
(in millions)

Library Resource Aid

Statute: Rhode Island General Laws: Title 29, Chapter 6

Background: Various sections of Chapter 29-6 of the Rhode Island General Laws, entitled "State Aid to Libraries," require that the state provide financial support to public libraries. The requirements of the sections are outlined below.

Grant-in-Aid. Section 29-6-2 of the Rhode Island General Laws requires that the state share of support to public libraries be 25.0 percent of the amount appropriated and expended from local tax revenues by the municipality in the second prior fiscal year. The funding was increased over time as specified by the statute until FY 2000; since then, the total state share has been 25.0 percent of the second prior fiscal year.

Previously, under the section of state law establishing the statewide library network, public libraries also received resource sharing funding to participate in the Cooperating Libraries Automated Network (CLAN). At the time the program was changed to the current grant program, a number of communities would have received less than they had received previously. Those communities were held harmless, with the balance of funds distributed proportionately; this was phased out over a three year period through FY 2006. Effective FY 2007, no communities would be held harmless under the grant program.

The 2002 Assembly enacted Article 7 of the FY 2003 Appropriations Act, which amended the law to allow proportional reductions in the event that the grants would exceed the amount appropriated. In 2003, Article 20 of the FY 2004 Appropriations Act established that additional state aid would be provided to only to the Providence Public Library, be based on the amount of its endowment income used to supplement the municipal appropriation, in an amount up to 25.0 percent of 6.0 percent of the three year average market value, calculated as of December 31 preceding the fiscal year that expenditures are certified for the purpose of determining state aid.

The 2004 Assembly further amended the law to allow inclusion of all other public libraries that use endowment funds to supplement the municipal appropriation. The state makes Library grant-in-aid payments to communities in December, March and May.

Procedure and Waiver Request. Rhode Island General Law 29-6-3 establishes that for a municipality to be eligible to receive library state aid, it must appropriate from local tax revenues an amount not less than the amount appropriated and expended for library operating expenses the previous year. The chief library officer annually determines each municipality's compliance with the maintenance of effort by comparing appropriation and expenditure amounts as reported by the libraries or the municipalities. The data to determine eligibility is generally provided by mid-September. In the event that a municipality has failed to meet the maintenance of effort requirement, the chief library officer will notify the municipality that it is not eligible

for a state grant in aid. A municipality that is deemed ineligible may request a waiver from the requirement by submitting a letter including the following information to the chief library officer:

- The appropriation amount necessary to meet the maintenance of effort requirement and evidence that the municipality, through its regular budget process, has appropriated an amount that is inadequate;
- The impact the reduction will have on library services, including the services that will be reduced; and
- Evidence that the decrease in funding of library services is comparable to decreases in funding for other municipal services.

The chief library officer will respond in writing to requests for waivers within six weeks. If a request for waiver is denied, the municipality may appeal the decision by sending a letter of appeal to the Chair of the Library Board. The appeal will be heard by the Library Board at its regular meeting or within six weeks, whichever is sooner. The municipality will be notified of the Board's decision within 10 days of the appeal hearing.

Support of Institutional Libraries. Section 29-6-7 of the General Laws requires that support for library services at state supported residential institutions and the School for the Deaf be funded at 25.0 percent of the amount appropriated and expended in the second prior fiscal year by the institution. The institutional libraries that qualify to receive grant-in-aid are located at the Adult Correctional Institution, the Eleanor Slater Hospital, the Training School, and the School for the Deaf.

Resources Sharing/Library Network. Section 29-6-9 of the Rhode Island General Laws establishes the statutory responsibilities of the Office of Library and Information Services, including providing all persons in the state with equal opportunity of access to informational resources. Subsection (a) requires that the Office of Library and Information Services include in its annual budget funds for the administration and operations of the Rhode Island Library Network. This includes sufficient funding to:

- Provide central support for the library network, including delivery of materials, telecommunications, consultant services, and access to bibliographic and other information sources;
- Reimburse libraries for the actual cost of providing services to individuals outside the library's primary clientele; and
- Support the development, maintenance of and access to the resource sharing potential of specialized collections and services provided by the Providence Public Library and other public libraries.

Subsection (b) requires that, by FY 2000, the State of Rhode Island would provide from state and federal sources 100 percent of the funding for the following statewide library services:

- Reference Resource Center at the Providence Public Library;
- Interlibrary delivery system;
- Interlibrary telecommunications system;
- Electronic Interlibrary loan system; and
- Statewide catalog of all library holdings.

Subsection (c) allows for the state to provide resources, subject to appropriation for continuing statewide access to databases.

Reference Resource Center at the Providence Public Library. The reference resource grant to the Providence Public Library enables the library to develop its reference collection, extend its hours, and provide statewide reference research for all Rhode Island libraries and residents. Additionally, the reference research service provides expertise in specialized areas such as patents and private foundation funding, reference and computer training for library staff, database access for public libraries and public library cardholders, online reference service via email, and live help via “AskRI.org.”

Interlibrary Delivery System. The Office of Library and Information Services is responsible for funding the interlibrary delivery system. This system includes the delivery of books, audio/visual materials, and other resources, which are shared between more than 180 public libraries, academic libraries, state libraries, school libraries, and other special libraries (such as the Rhode Island Historical Society). The contract with the private vendor providing the services is based on the number of stops made, not on the number of items delivered. Subsections (a) and (b) of Rhode Island General Law 29-6-9 both require the Office of Library and Information Services must annually include full funding of this function in its budget.

With ongoing funding from a federal grant, a cooperative automation system called RILINK serves 69 school libraries in Rhode Island. Membership fees from participating schools also support the RILINK network. RILINK school libraries can share materials with other RILINK member libraries as well as with all other libraries in the RI Resource Sharing/Library Network.

Interlibrary Telecommunications System. The Office of Library and Information Services assists qualified libraries and schools in obtaining discounts for telecommunications and Internet access through the Telecommunications Education Access Fund, commonly known as E-Rate, established in February 2003 with passage of 2003-S 843. The fund is administered by the Department of Elementary and Secondary Education.

Electronic Interlibrary Loan System. The Office of Library and Information Services contracts with the Online Computer Library Center (OCLC) for interlibrary loan services and for online access to other OCLC member libraries. Expenditures budgeted for the Office of Library and Information Services’ include an annual membership fee and fees for services provided.

Statewide Catalog of all Library Holdings. The Office of Library and Information Services uses an online service called "Relais" that interconnects all of Rhode Island's online library catalogs and facilitates the discovery, request, tracking and return functions of interlibrary loan. The catalogs are Ocean State Libraries (public libraries, OLIS and St. George's School), HELIN (academic libraries and hospitals), and RILINK (K-12 schools); each can provide search access to the holdings of Rhode Island libraries using the Internet.

Funding: The interlibrary delivery system and the electronic interlibrary loan system are funded through the operating budget of the Office of Library and Information Services, and are not considered state aid. Funds are not required at this time for the interlibrary telecommunications system.

Only the grant-in-aid funding for the Statewide Reference Resource Center at the Providence Public Library and grants to institutional libraries are considered state aid. These are funded from general revenues.

As the following table illustrates, funding remained relatively stable for the period from FY 1991 through FY 1997. In FY 1998, the General Assembly appropriated an additional \$1.0 million to begin increasing funding to meet the requirement of 25.0 percent for the grant-in-aid program by FY 2000. An additional increase of \$1.2 million was appropriated for FY 1999 to continue the trend. In the FY 2000 budget, the Assembly added \$2,029,726 over FY 1999 funding to reach the required level of a total of 25.0 percent for grants-in-aid. The Assembly appropriated funds over the required 25.0 percent for FY 2003 through FY 2007. Funding was reduced to 25.0 percent for FY 2008. The same total funding amount has been provided since.

Fiscal Year	Grant-In-Aid	Percent of		Reference Year
		Percent of Local Expenditures	Endowment Expenditures*	
1989	\$ -	na	-	NA
1990	677,446	na	-	NA
1991	437,902	3.83%	-	1989
1992	326,976	2.61%	-	1990
1993	296,918	2.22%	-	1991

2011	8,773,398	25.00%	25.00%	2009
2012	8,773,398	25.00%	25.00%	2010
2013	8,773,398	25.00%	25.00%	2011
2014	8,773,398	25.00%	25.00%	2012
2015	8,773,398	25.00%	25.00%	2013

**Providence only in FY 2004; all capped at 6% of the three-year average market value of investments in the endowment.*

In his FY 2003 budget, Governor Almond recommended that the statute be changed to make funding subject to appropriation, and recommended freezing funding at the level enacted for FY 2002. The Assembly concurred with the statutory change, but included funding for the 25.0 percent level.

The 2003 Assembly amended the law to allow inclusion of endowment funding as part of local effort for Providence, which resulted in additional funding of \$654,835 for FY 2004. The 2004 Assembly further amended the law to allow inclusion of all other statewide libraries that receive endowment funding. This resulted in additional expenditures to state support for libraries in the amount of \$224,544 for FY 2005. The 2005 Assembly passed 2005-H 5170, Substitute A, as amended, subjecting any library that funded a majority of its operational budget in the prior year with public funds to the open meetings law.

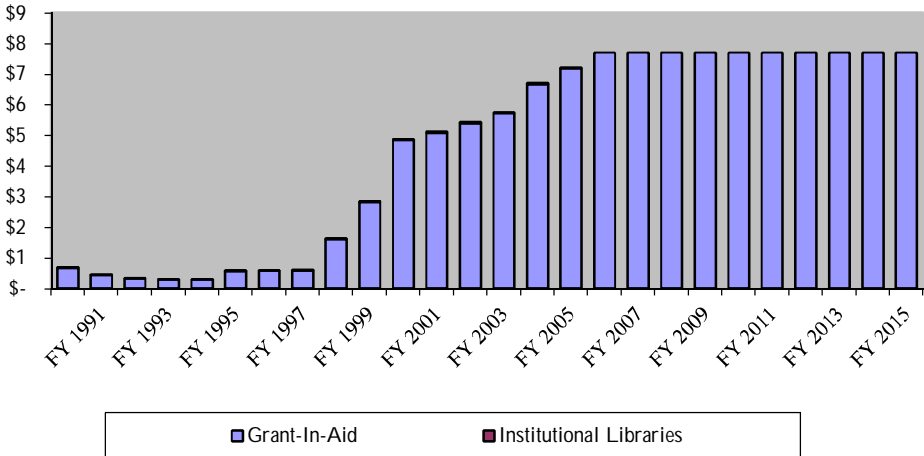

The FY 2006 budget included \$8.4 million to fully fund library aid, including \$0.9 million in endowment-based funding for various libraries. The FY 2007 budget

included \$8.7 million for library aid. The FY 2008 budget included \$8.8 million for library aid, including \$1.1 million in endowment-based funding.

The 2008 Assembly concurred with Governor Carcieri's recommendation to provide \$8.8 million for FY 2009 library operating aid. The Assembly also enacted legislation to reduce the maintenance of effort requirement for municipalities to provide library services, to at least 80.0 percent of the previous year's funding for FY 2009 and FY 2010. Funding provided has remained consistent at \$8.8 million each fiscal year from FY 2008 through FY 2015. Communities' distributions reflect updated data.

The following graph shows total state funding for library services, grant-in-aid payments, and the grant to the Providence Public Library for the Statewide Reference Resource Center from FY 1990 through FY 2015.

Library Resource Aid
(in millions)

Library Construction Aid

Statute: Rhode Island General Laws: Section 29-6-6

Background: Section 29-6-6 of the Rhode Island General Laws establishes a library construction aid program. The Office of Library and Information Services is empowered to make grants-in-aid to a municipality or a free public library for the construction or capital improvement of any public library, designed to provide better services to the public. Since the program's inception in 1965, \$44.8 million has been committed to reimbursement of 89 public library construction projects in 33 communities in Rhode Island.

In general, library construction and renovation projects considered by the Office of Library and Information Services must meet certain criteria to be considered for a grant-in-aid:

- The library must be eligible for state grant-in-aid as defined in Rhode Island General Law 29-6-3;
- The project must improve public library services, meeting the needs of the community for at least the next 10 years; and
- Funds equal to or more than the state grant-in-aid must be appropriated for the same purpose by the city or town or dedicated to the same purpose from private sources.
-

Projects meeting these criteria are ranked according to the priorities established by the Library Board of Rhode Island.

In FY 1999, the program was restarted after an eight-year hiatus. As part of the restarted program, the Library Board of Rhode Island revised its priorities for construction projects. Projects would be assigned priority based on the ability to pay, with communities in the lowest quartile of "equalized weighted assessed valuation" ranked highest. Additionally, communities that have not completed a construction project involving state construction reimbursement funding would be given higher priority.

As part of this process, the Library Board of Rhode Island established a \$5.0 million annual cap on construction reimbursement payments for FY 2003; however, the actual funding for any given year would be subject to appropriation. Additionally, caps were established on allowable costs. These were set as \$150 per square foot for new construction and \$125 per square foot on renovation and remodeling. It should be noted that the cost per square foot is determined by the cost of contracts for new construction or contracts for expansion, remodeling and alteration of existing buildings. It does not include other costs such as architect and consultant fees, site acquisition, initial equipment and furnishings, landscaping and parking lots, most of which are eligible for 50.0 percent reimbursement.

In 2005 a study was undertaken, at the request of the Rhode Island library community and the Library Board, in consultation with the Office of Library and Information Services, to review the costs of library construction in Rhode Island and the northeast to determine if the allowable costs per square foot should be increased to keep pace with the rising costs of construction. In early 2006, the Library Board approved an increase in allowable costs for construction. The new caps were set at \$200 per square foot for new construction and \$175 per square foot for renovation and remodeling projects.

Reimbursable costs also include any cost of borrowing the state share during the construction period. Examples of costs not eligible for state funds include the cost of fundraising or the costs associated with temporary locations or moving library collections. In a case where the library is a component of local government, payments are made to the municipality. Payments for free public libraries are made directly to the libraries.

The state grant-in-aid is limited to a maximum of 50.0 percent of the total eligible costs as determined by the Office of Library and Information Services. Grants are paid on an installment basis for a period up to 20 years; payments do not begin until the state fiscal year following the completion, acceptance, and audit of the project. The state makes library construction aid payments to communities on a case by case basis, based on the timing of each community's debt service payments.

Library construction aid is indirect aid. Payments are not necessarily made to a local government. As some payments are made directly to free public libraries, the program cannot be considered traditional local aid. Additionally, funds are targeted for specific use and are not for general support of the local government or the library's operating budget.

Funding: Payment of the state grant-in-aid has been made from two sources of funds, federal grants and general revenues. When federal funds were made available in past fiscal years, attempts were made to use these funds for projects in which the federal funds would cover all or part of the total state share of the project. Payments from federal funds were made as lump sum payments upon completion of the project. Federal fund payments were not spread over a number of fiscal years as state-funded payments have been. For those grants for which the state share of the project was funded from both federal and state sources, the federal funds were expended in full in the first year of reimbursement. The remaining state-funded portion would be paid in installments.

In September 1996, Congress passed the Library Services and Technology Act (LSTA). This act was a major revision of the federal program providing federal funds for public library services; no funds will be made available for construction reimbursement. Going forward, therefore, any grants made by the state would be funded solely from general revenues.

In the mid-1990s, a policy was established not to fund any additional projects. This action was the result of the severe financial constraints on the state budget earlier in the decade. The impact of this policy is seen in the following graph as a reduction in annual payments for several years, as projects were paid in full and no longer required an appropriation. Required payments continued on existing grant agreements; commitments for these ongoing payments would continue through FY 2014.

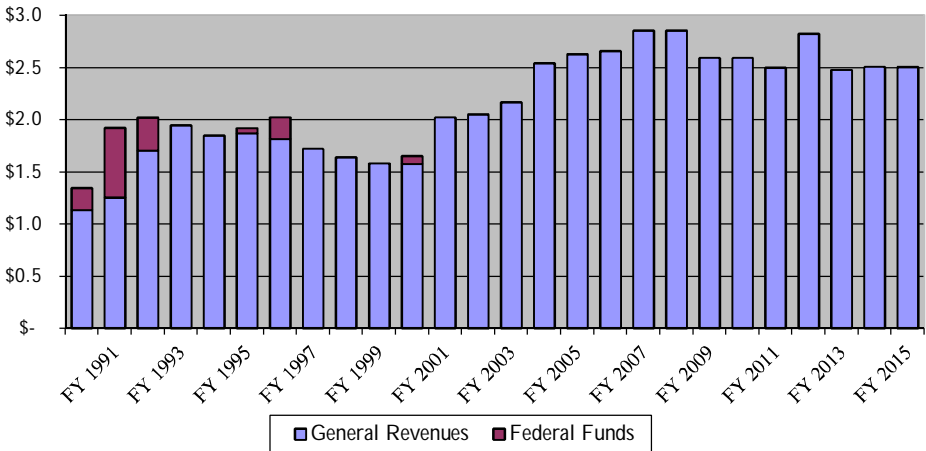

In April 1998, Governor Almond issued executive order 98-4, which reinstated the library construction aid program. At this time, the Library Board of Rhode Island began to revise its priorities for construction aid, setting limits in the level of reimbursement to be made by the state. The revised policies became effective in February 1999.

The Office of Library and Information Services undertook a Public Facilities Survey and Capital Budget Forecast in 1998. This survey became the document that provides an estimate of potential state commitments for construction grants in the out-years. The survey showed the potential for state grants of \$40.0 million based on planned capital improvement projects at libraries statewide. A number of these projects were eligible for reimbursements beginning in FY 2001, and the number of projects would continue to increase due to the reinstatement of the program.

The Public Facilities Survey was updated again in 2003 and is now updated periodically. The current estimated potential for state grants is \$47.0 million based on planned capital improvement projects at libraries statewide over the next ten years.

The state has maintained full funding of this program since FY 1999. However, the 2011 Assembly adopted legislation to impose a three-year moratorium on acceptance of applications for library construction aid projects through July 1, 2014.

**Library Construction Aid
(in millions)**

Municipal Police Incentive Pay Program

Statute: Rhode Island General Laws: Title 42, Chapter 28.1

Background: Section 42-28.1-1 of the Rhode Island General Laws establishes the Municipal Police Incentive Pay program. The purpose is to provide financial compensation to members of the state, city, and town police departments, sheriffs, deputy sheriffs and marshals, Rhode Island capitol police, park police and conservation officers of the Division of Enforcement in the Department of Environmental Management, and the state fire marshal and deputy fire marshals who have earned college credits in the fields of law enforcement, criminal justice, or fire science.

For state employees, the incentive payment is made by the state agency for which the employee works and funds are included in each agency's budget. For municipal employees, payments are made by the state directly to the municipalities; the municipalities make payments to the participants in the program. Since funds are targeted for specific use and are not for general support of local government, funding for this program is indirect aid.

The amount of the incentive is based on a point system, which is related to the education level attained by the participant. The participant must be enrolled in a law enforcement degree program and take a minimum of nine credit hours per year, receiving a degree within six years of receiving the incentive program credit. The following table outlines the incentive requirements for this program.

Incentive Step	Incentive Amount	Points Acquired
1	\$1,000	30 points
2	\$2,000	Associate's Degree in Law Enforcement
3	\$3,000	Bachelor's Degree in Law Enforcement or Criminal Justice
4	\$3,500	Juris Doctor, Master's Degree in Law Enforcement (with Bachelor's Degree in Law Enforcement, Criminal Justice, or Law)

Each semester hour earned from eligible institutions with concentrations in police and legal studies, including behavioral science, is equivalent to one incentive program point. An Associate of Science degree is equivalent to 60 points; a Bachelor of Arts or of Science earns the participant 120 points. The state fire marshal and deputy fire marshals can be granted incentive credits for a degree in fire science.

Over time, the definition of an eligible participant changed. In 1987, the state fire marshal and deputy fire marshals in the Rhode Island Division of Fire Safety were added to the program. In 1997, the Division of Drug Control of the Department of Health was abolished; its employees had been eligible for incentives.

Incentive program payments were made to communities in December of each year.

Significant Legislative Amendments: Section 42-28.1-7 of the Rhode Island General Laws requires that the General Assembly annually appropriate the funds it deems

necessary for the incentive pay program. The law was amended in 1983 allow a ratable reduction in payments if annual appropriations are not sufficient to fully fund the program. The ratable reduction was first used for FY 1992, when the incentive totaled 64.0 percent of eligible amounts. Prior to FY 1992, the program was fully funded.

The 1993 Assembly amended the statute to establish that participants would not receive less than 25.0 percent of their full incentive. The 1995 Assembly repealed this requirement. Payments have not exceeded 20.0 percent since FY 1995.

Funding: The Municipal Police Incentive Pay program was fully funded in FY 1990 and FY 1991 with appropriations of \$2.7 million and \$2.8 million, respectively. By FY 1996, funding had been reduced to approximately \$500,000, where it remained through FY 1998. In FY 1999, the Assembly increased total program funding to \$550,000; subsequent annual ten percent increases brought funding to \$732,050 for FY 2003. It remained at that level for FY 2004, FY 2005, and FY 2006.

Governor Carcieri recommended Article 9 of 2006-H 7120 to eliminate program for FY 2007. At the time, it served 1,138 officers and would cost \$0.7 million. The Assembly did not concur and funded program with \$450,000. The Assembly provided \$450,000 for FY 2008, consistent with the Governor’s recommendation.

Governor Carcieri recommended Article 13 of 2008-H 7390 to repeal this program for FY 2009. The 2008 Assembly maintained the program in the general laws; however, provided no funding. The program has not been funded since.

The following graph shows the total annual appropriation for this program from FY 1987 through FY 2015.

Municipal Firefighters Incentive Pay Program

Statute: Rhode Island General Laws: Title 42, Chapter 28.4

Background: Section 42-28.4-1 of the Rhode Island General Laws establishes a Municipal Firefighters Incentive Pay Program. The purpose of this program is to provide financial compensation to members of the municipal fire departments and fire districts, the Cumberland rescue department and emergency service technicians of the Town of Lincoln who have furthered their education at the college level. Payments are made by the state directly to the municipalities, which, in turn, make payments to the participants in the program. Since funds are targeted for specific use and are not for general support of the local government, funding for this program is indirect aid.

The amount of the incentive is based on a point system, which is related to the education level attained by the participant. The participant must be enrolled in degree program with a concentration in fire sciences, taking a minimum of nine credit hours per year, receiving a degree within six years of receiving the incentive program credit. The following table outlines the incentive requirements for this program.

Incentive Step	Incentive Amount	Points Acquired
1	\$1,000	30 points
2	\$2,000	Associate's Degree
3	\$3,000	Bachelor's Degree

Each semester hour earned from eligible institutions with concentrations in fire science, or police and legal studies, including behavioral science, is equivalent to one incentive program point. An Associate of Science degree is equivalent to 70 points; a Bachelor of Arts or of Science earns the participant 140 points.

Eligibility for the program has remained constant with the exception of one amendment. In 1985, members of the Cumberland rescue department and emergency service technicians in the Town of Lincoln were made eligible for the incentive pay program.

Significant Legislative Amendments: Section 42-28.4-6 of the Rhode Island General Laws requires that the General Assembly annually appropriate the funds it deems necessary for this incentive pay program. The law was amended in 1983 allow for a ratable reduction in payments if annual appropriations are not sufficient to fully fund the program include the ratable reduction provision. The ratable reduction was first used for FY 1992, when the level of incentive totaled only 64.0 percent of the eligible amounts. Prior to FY 1992, the program was fully funded.

The 1993 Assembly enacted legislation establishing that participants would not receive less than 25.0 percent of their full incentive. However, the 1995 Assembly repealed this requirement. Payments have not exceeded 20.0 percent since FY 1995.

Funding: The Municipal Firefighters Incentive Pay program was fully funded in FY 1990 and FY 1991 with appropriations of \$1.4 million each year. Funding for the program was reduced to approximately \$0.3 million by FY 1996. In FY 1999, the Assembly increased total program funding to \$275,000; subsequent annual ten percent increases brought funding to \$0.4 million for FY 2003. It remained at that level for FY 2004, FY 2005, and FY 2006.

Governor Carcieri recommended Article 9 of 2006-H 7120 to eliminate the incentive program for FY 2007. At the time, it served 478 firemen and would cost \$0.4 million. The 2006 Assembly maintained the program, appropriating \$225,000 for FY 2007. Consistent with Governor Carcieri’s recommendation, the 2007 Assembly provided \$225,000 for FY 2008.

Governor Carcieri recommended Article 13 of 2008-H 7390 to repeal the program for FY 2009. The 2008 Assembly maintained the program in the general laws; however, provided no funding. No funding has been provided since.

The following table shows the total annual appropriation for this program from FY 1987 through FY 2015.

Property Revaluation Reimbursements

Statute: Rhode Island General Laws: Section 44-5-11.6

Background: Section 44-5-11.6 mandates property revaluations and statistical updates according to a schedule defined in statute. Once fully implemented, all municipalities will be required to complete full revaluations every nine years with statistical updates in the third and sixth years following the full revaluation.

The statute defines a transition period for communities having conducted or implemented revaluations as of 1993 or later. From 2000 through 2003, these communities were required to complete a statistical update with a full revaluation three years later. For all other municipalities, the statute defines a schedule for two statistical updates before a complete revaluation will be required. A table showing the next statistical updates and full revaluations is shown on the next page. The implementation dates are December 31 of the years shown.

The statute also requires that the state reimburse municipalities for 100 percent of the cost of the first update, not to exceed \$20 per parcel. Reimbursements for subsequent updates are set in statute at 80.0 percent (up to \$16 per parcel) for the second statistical update and 60.0 percent (up to \$12 per parcel) for the third and all subsequent updates. A distressed community will receive 80.0 percent reimbursement for the second and all subsequent updates. The state reimbursement is made upon receipt of bills for completion of the revaluation.

Significant Legislative Amendments: The 1997 Assembly enacted legislation to implement the statistical updates. The original statute provided for per-parcel reimbursements of \$15 for the first update, \$10 for the second, and \$6 for the third and all subsequent updates. These levels were increased by the 2000 Assembly, based on the actual costs of contracts entered into by a number of municipalities. The actual costs were closer to \$20 than \$15 per parcel; reimbursement limits were increased in an attempt to provide 100 percent reimbursement for the first updates.

Funding: Expenditures fluctuate annually. The state reimbursed \$1.5 million for FY 2001, \$1.0 million for FY 2002, and \$1.3 million for FY 2003. FY 2004 reimbursements were \$2.5 million. They were \$0.6 million in FY 2005, \$0.9 million in FY 2006, \$2.2 million in FY 2007, \$1.1 million in FY 2008, \$1.0 million in FY 2009, \$1.5 million in FY 2010, \$0.8 million in FY 2011, \$0.9 million in FY 2012, and \$1.6 million for FY 2013.

The 2014 Assembly concurred with Governor Chafee's recommendation to provide \$0.5 million for FY 2014 and \$0.6 million for FY 2015 to reimburse communities conducting property valuation updates.

Oversight Reimbursement

Statute: Rhode Island General Laws: Sections 45-9-10.1

Background: Rhode Island General Law 45-9-10.1 establishes the position of finance advisor in municipalities previously subject to the Fiscal Stability Act, for which no federal Chapter 9, Title 11 petition was filed. The finance advisor is an appointee of the Director of Revenue, responsible for monitoring the overall budgetary and financial administration and fiscal health of the city or town for five years following the end of state supervision. The state must reimburse the city or town 50.0 percent of the cost of the finance advisor.

Funding: Reimbursements made to municipalities are funded from general revenues. The 2014 Assembly concurred with Governor Chafee's recommendation to provide \$0.1 million each year for both FY 2014 and FY 2015 to reimburse Central Falls and East Providence.

State Mandates

Statute: Rhode Island General Laws: Sections 45-13-7 through 45-13-10

Background: Section 45-13-9 of the Rhode Island General Laws requires that the Department of Administration submit to the Budget Office a report by municipality of the costs of mandates, established since January 1, 1979, to be reimbursed in the next fiscal year. A mandate is defined as “any state initiated statutory or executive action or rule, regulation or policy adopted by a state department or agency or a quasi-public department or agency that requires a local government to establish, expand, or modify its activities in such a way as it necessitates additional expenditures from local revenue sources where the expenditures are not otherwise reimbursed in whole or in part.”

The statute requires that the Budget Office annually include the statewide total of the costs of state mandates to be reimbursed in the next fiscal year in the budget. Funds are to be distributed in July of each year. Data regarding the reimbursable costs is collected in April of each year for the preceding July 1 to June 30 period.

Funding: Expenditures totaled \$76,389 and \$150,106 for FY 1990 and FY 1991, respectively. In FY 1992, expenditures were \$102,316. This was the last year in which funds were appropriated for state mandate payments.

The 2008 Assembly adopted Governor Carcieri’s recommendation contained in Article 18 of 2008-H 7204 to require the Budget Office to forward the costs for unfunded mandates to the Governor for consideration. Additionally, the state treasurer would reimburse the communities if a general revenue appropriation is made by the General Assembly.

Public Service Corporation Tax

Statute: Rhode Island General Laws: Section 44-13-13

Background: The tangible personal property of telegraph, cable, telecommunications corporations, and express corporations, used exclusively in conducting business for the corporation is exempt from local taxation, but is subject to taxation by the state. Tangible personal property includes lines, cables, ducts, pipes, machines and machinery, and equipment.

By March 1st of each year, companies are required to declare the value of their tangible personal property to the Division of Taxation. The Division of Taxation uses this data to calculate the taxes due from each company, based on the average assessment ratios in the state and the average property tax rate. Funds are collected by the Division.

The statute allows for the use of up to 0.75 percent for administrative expenses; these funds are deposited as general revenues. The remaining funds are distributed to the municipalities on the basis of the ratio of the municipal population to the state population. For distribution purposes, population data from the most recent census is used.

Payments are made to municipalities in July of each year.

Significant Legislative Amendments: The 1985 Assembly amended Chapter 44-13 to change references to "telephone corporations" to "telecommunications corporations," and to replace the word "utility" with "corporation" throughout the chapter.

The 1990 Assembly altered the timing of payments to certain municipalities. The law previously required that payments be made to municipalities no later than July 30 for any city or town with a June 30 fiscal year end. Payments were to be made no later than the last month of the municipality's fiscal year end for any city or town with a different fiscal year end. The amendment established that payments would be made to all cities and towns by July 30.

In his FY 2003 budget, Governor Almond recommended a change to the public service corporation tax that would provide local governments with \$6.7 million of additional property taxes by changing the method of levying this tax on the telecommunications companies' property from the average assessment ratios in the state and the average property tax rate to using a weighted average tax rate, determined as the sum of each community's tax rate multiplied by its percent of total population. The Assembly did not concur.

Collections from had declined from \$18.0 million in FY 2003 to an estimated amount of \$12.2 million included in Governor Carcieri's FY 2007 recommended budget. Part of the decline was due to an overall decline in the value of assets after depreciation. Values had increased rapidly in the late 1990s and 2000 following investments in fiber

optics; the value of those technologies declined after a few years. Additionally, more frequent tax revaluations lowered the average statewide property tax rate used in calculating the tax.

Governor Carcieri therefore included Article 6 in his FY 2006 revised budget to freeze the statewide tax rate applied to tangible personal property of public service corporations at the 2005 rate. The Assembly did not concur.

The 2009 Assembly froze the tax rate applied to the tangible personal property of public service corporations for FY 2009 at the FY 2008 rates to prevent the municipal loss of \$645,000 in public service corporation tax revenues.

Funding: Taxes are due from the corporations in June of each fiscal year; payments are made in July from those receipts. Funds for this program are not included in the annual appropriations act.

The FY 2015 budget assumes the state will collect \$14.3 million of property taxes from public service corporations on behalf of municipalities to be passed back.

The following table shows the total annual distribution for this program from FY 1987 through FY 2015. See *Appendix IV* of this publication for payments distributed by municipality for each fiscal year.

Public Service Corporation Tax
(in millions)

Toll Reimbursement – Newport/Jamestown

Statute: Rhode Island General Laws: Section 24-12-26

Background: The Rhode Island General Laws allow for members of the Newport and Jamestown fire and police departments and rescue personnel to be reimbursed for the cost of tolls on the Newport Bridge when using the bridge in the course of duty. The individuals are to be reimbursed by the municipality, and the municipality reimbursed by the state.

Funding: In order for payment to be made, the municipality must request reimbursement from the state. Payments have been made in only five of the last thirteen years. These totaled \$11,743 in FY 1994, \$1,166 in FY 1995, \$3,247 in FY 1997, \$2,227 in FY 2000 and \$2,200 in FY 2001.

The City of Newport has not requested its reimbursement since FY 1999 and Jamestown has not sought its reimbursements for FY 2009 and FY 2010. The FY 2011 final budget included \$53,000 for toll expenses; however, the City of Newport did not submit the required invoices. Jamestown was reimbursed \$7,031 for FY 2012. Reimbursements for Jamestown have not been requested since.

Fiscal Stability Act

The 2010 Assembly enacted legislation to enable the state to work with municipalities undergoing financial distress that threatens their fiscal well-being, public safety, and welfare. Acting primarily through the Department of Revenue, the state may exercise varying levels of support and control depending on circumstances.

Following the downgrade of debt issued by both the cities of Central Falls and Woonsocket to below investment grade, rating agencies expressed concern over the fiscal soundness of the state as a whole and of its individual municipalities. The Assembly therefore instituted a legal process by which the state is able to advise and provide oversight to a city or town experiencing financial distress to a degree that threatens its fiscal well-being, public safety, and welfare. Should other cities and towns or the state as a whole be threatened by a municipality's financial distress, the Act empowers the state to provide assistance and supervision. The Act additionally prohibits municipalities from filing for judicial receivership.

Under the Fiscal Stability Act, there are three levels of state oversight and control: the appointment of a fiscal overseer, the establishment of a budget commission, and the appointment of a receiver. Powers and duties of the fiscal overseer include supervising all financial services and activities; reviewing all proposed contracts and obligations, and monitoring all expenditures. If the fiscal overseer is unable to present a balanced budget or faces a fiscal crisis that poses an imminent danger, the law allows for the formation of a budget commission, which may exert significantly more control over the municipality's finances and daily operations. In the event that budget commission is unable to provide financial stability, the Director of the Department of Revenue may terminate the commission and appoint a receiver, a position that has all powers and duties of the fiscal overseer and the budget commission.

The 2011 Assembly enacted legislation to establish bond holders as the first lien on an impacted municipality's tax revenue. If a municipality files for bankruptcy under Chapter 9 of Title 11 of the United States Code, its bondholders are the first to be repaid. However, the state is held harmless for the municipality's debts.

The 2013 Assembly enacted legislation establishing an administrative and fiscal advisory position for a period of five years after state oversight ends. The state reimburses a municipality 50.0 percent of the cost of the position's salary and benefits. Both East Providence and Central Falls appointed administration and finance officers in FY 2014. The 2014 Assembly amended the statutes to include fire districts as subject to the Act.

The following table shows the four local entities that have come under state supervision via the Act and major actions taken.

Entity	Date	Action Taken
Central Falls	May 19, 2010	City files Superior Court petition for appointment of receiver
	June 11, 2010	Governor Carcieri signs Fiscal Stability Act
	July 16, 2010	Receiver appointed
	August 1, 2010	City files for bankruptcy in federal court
	September 9, 2012	City exits bankruptcy - 5 year financial plan
	April 15, 2013	Receivership dissolved
East Providence	December 11, 2011	Budget Commission established
	September 16, 2013	Budget Commission dissolved
Woonsocket	May 29, 2012	Budget Commission established
Central Coventry Fire District	May 6, 2014	Receiver appointed

Recent Legislation Affecting Municipalities

Rhode Island municipalities have traditionally relied heavily on taxation of real and personal property. With the exception of three taxes that are collected by the Division of Taxation and remitted to the cities and towns, local governments do not have the option of levying a local sales tax or income tax.

The General Assembly has enacted multiple pieces of legislation designed to assist municipal governments ensure their own fiscal stability.

Collective Bargaining Agreements. The 2012 Assembly adopted legislation to extend the maximum length of collective bargaining agreements for firefighters, police officers, certified school teachers and municipal employees from three to five years in the cases where a budget commission or a receiver has been appointed.

Municipal Pension Plans. Municipal pension benefits are provided through either the state-run Municipal Employees' Retirement System (MERS) or through locally-administered plans, often referred to as non-MERS plans. Thirty-six non-MERS pension plans are locally-administered (not governed by state law) by 24 communities, of which half cover public safety employees. The local community is entirely responsible for administering and funding these plans, many of which are included in collective bargaining agreements. A few municipal employees are covered by plans administered by employee unions.

The 2011 Assembly adopted legislation to begin to address the pension deficiencies in locally administered programs. They include:

- Requiring non-MERS plans to complete actuarial reviews by April 1, 2012, the state reimburses communities for 50 percent of the cost of completing an actuarial study;
- Requiring non-MERS plans to complete an initial experience study no later than April 1, 2012, and every three years thereafter;
- Establishing a 14-member Commission to review existing legislation and local pension plan administrative practices;
- Requiring all locally-administered pension plans with funded ratios below 60.0 percent to submit a pension funding improvement plan within 180 days; and
- Penalties for non-compliance include withholding of state aid

Municipal Reporting. The 2011 Assembly enacted legislation requiring all municipalities to provide the Division of Municipal Finance a five-year forecast including options for funding annually required post-employment benefit liabilities, certified tax rolls no later than the next succeeding August 15, fiscal impact statements for changes in health care plans and to notify the auditor general and the Division within 30 days after the end of the fiscal year if it is likely to incur a deficit. The legislation also requires local school districts to submit corrective action plans to the Division within five days of discovery of potential or actual over expenditure or

revenue deficiency in addition to the current practice of submitting them to the city or town council president.

Retiree Health. The 2011 Assembly enacted legislation that allows municipalities to require its retirees to enroll in Medicare upon eligibility as a condition of receiving or continuing to receive retirement and other post-employment benefits.

Administrative Procedures. The 2008 Assembly amended the administrative procedures statute to allow municipal governments to substitute the notice printed in newspapers with a posting on a website that may be maintained by the Secretary of State.

Fiscal Impact Statements. The 2008 Assembly enacted legislation to require school committees and city and town councils to prepare fiscal impact statements for all collective bargaining contracts for the term of the contracts. Impact statements and awarded contracts must be publicized and be made immediately available upon ratification.

Health Insurance Collective Bargaining. The 2008 Assembly enacted legislation, effective August 1, 2008, to prohibit the state and municipalities from specifying that an employer must procure a health care benefit plan from a specific provider in collective bargaining contracts. Additionally, specifications for the health care benefit plans cannot be constructed to identify an exclusive provider for the benefits.

Municipal Finances. The 2008 Assembly created the Advisory Council on Municipal Finances to recommend on a uniform system of accounting for all municipalities. The Council on Municipal Finances must take into consideration the work of the Advisory Council on School Finances, created by the 2004 Assembly.

Property Tax Cap. The 2006 Assembly enacted legislation to cap the property tax levy at 5.25 percent over the prior year, dropping annually by 0.25 percent to 4.0 percent by FY 2013. Prior to the legislation, communities would increase property taxes up to 5.5 percent, and could apply that limit to either the rate that taxpayers pay or the overall tax levy. The property tax relief act applies the tax cap strictly to the levy. The legislation includes safeguards to enable communities to exceed the cap in emergencies.

Fiscal Year	Percentage Levy
2008	5.25%
2009	5.00%
2010	4.75%
2011	4.50%
2012	4.25%
2013	4.00%

The Division of Municipal Finance issues an annual report on the property tax cap, including certified tax levies for the fiscal year and notation of municipalities that have

requested an exemption to allow for a percentage increase greater than that allowed in statute. For FY 2014, the Division reported that no municipality requested an exemption. One municipality requested an exemption for FY 2013, two for FY 2012, thirteen requested exemptions for FY 2011, five requested exemptions for FY 2010, and seven requested exemptions for FY 2009. All were approved.

Fiscal Year	Statutory Max. Percent Increase	Number of Municipalities Exceeding Cap
FY 2014	4.00%	0
FY 2013	4.00%	1
FY 2012	4.25%	2
FY 2011	4.50%	14
FY 2010	4.75%	4
FY 2009	5.00%	9
FY 2008	5.25%	6

The following table shows property tax percentage increases for FY 2009 through FY 2013.

Appendix VI
Distressed Communities Relief Calculation Data
FY 2015

Distressed Communities Relief Program

Distressed Communities Relief Program payments are made to communities falling in the highest 20.0 percent for at least three of the four indices used to determine eligibility. The indices are (1) percent of tax levy to full value of property, (2) per capita income, (3) percent of personal income to full value of property, and (4) per capita full value of property. As there are 39 municipalities in the state, the 8 highest scoring cities and towns for at least three distressed indices qualify.

The community rankings for FY 2015 are shown in the table on the next page. This is followed by explanations of each of the indices along with tables showing the communities' indices values and rankings.

The indices are explained below with the data presented for each community, followed by a summary of the ranking and the actual distribution to eligible communities. Each of the four indices are shown separately with the calculations and the community rankings to determine eligibility. Then a summary sheet is shown detailing the summarized rankings for the communities for all four indices. The final page of the appendix shows the qualifying communities and the distressed community relief fund payments awarded to each. The following paragraphs explain how the indices are calculated.

Index 1: Percent of Tax Levy to Full Value of Property. The percent levy to full value of property index is computed by dividing the tax levy of each municipality by the full value of property for each municipality based on the most recent available information collected by the Division of Municipal Finance.

- A.** The full value of property is shown in column **A**.
- B.** Municipal tax levies are shown in column **B**.
- C.** Tax levy as a percent of full value is shown in column **C**.
- D.** Community rankings on tax levy as a percent of full value is shown in column **D**. Central Falls, Cranston, Johnston, North Providence, Pawtucket, Providence, West Warwick, and Woonsocket have the eight highest rankings on this index.

Index 2: Per Capita Income. The communities are ranked on per capita income reported by the United States Department of Commerce Bureau of the Census. Per capita income for 2012 is shown in the first column of the table. The eight communities with the lowest per capita income are Central Falls, Cranston, East Providence, North Providence, Pawtucket, Providence, West Warwick, and Woonsocket.

Woonsocket	20,979	2

Index 3: Percent of Personal Income to Full Value of Property. The facing page shows the calculations.

A. Column **A** shows the most recent population estimate as reported by the United States Department of Commerce, Bureau of the Census.

B. Population in column **A** is then multiplied times per capita income from the previous table to calculate the personal income for each community shown in column **B**.

C. Full value of property is shown in column **C**. This is the data from index 1.

D. The percent of personal income to full value of property shown in column **D** is computed by dividing the personal income in column **B** by the full value in column **C**.

E. Column **E** shows the community rankings. Burrillville, Central Falls, Cumberland, Gloucester, North Providence, Pawtucket, West Warwick, and Woonsocket fall in the top eight rankings.

Index 4: Per Capita Full Value of Property. The next page shows the calculations for the final index, the per capita full value of property. This calculation is based on dividing the full value of property by population, and ranking the communities as shown in columns **C** and **D**. Columns **A** and **B** contain values previously discussed and used in the other indices.

Burrillville, Central Falls, Johnston, North Providence, Pawtucket, Providence, West Warwick and Woonsocket fall within the top eight for this criterion.

Eligible Communities. The final tables show the use of the rankings and the data to make the distributions to the qualifying communities. The table on the facing page presents a summary of the rankings. Twelve communities qualified on at least one index, but only six qualified on at least three: Central Falls, North Providence, Pawtucket, Providence, West Warwick and Woonsocket qualify for distressed community funding for FY 2014 by obtaining a ranking of one through eight in at least three of the four above mentioned indices. For FY 2011, East Providence qualified for distressed aid and North Providence was disqualified. For FY 2012, Burrillville and East Providence disqualified and North Providence qualified for distressed aid. For FY 2013, Cranston qualified for aid and East Providence disqualified. For FY 2015, Cranston does not qualify as distressed. The Assembly includes the redistribution of 50.0 percent of Cranston's FY 2014 allocation to the other six communities for FY 2015.

Distributions. The funds are normally distributed on the basis of each qualifying community's tax levy as a percent of the sum of the tax levies for all the qualifying distressed communities as shown on the facing table.

The 2005 Assembly passed Article 11 of 2005-H 5270, Substitute A, to allow communities to qualify as distressed if they fall into the lowest 20.0 percent for at least three of the four indices used to determine eligibility. For FY 2006, this allowed North Providence as a new entrant into the program. The law allows for the new qualifying community to receive 50.0 percent of its payment for the first year, then full funding thereafter. The remaining 50.0 percent would be distributed to the other distressed communities to lessen the effect of the loss of funds due to a new entrant. When a community falls out of the distressed community program, it receives a one-time transition payment of 50.0 percent of the eligible prior year payment.

For FY 2006 and FY 2007 program funding included a \$5.0 million appropriation from general revenues and included \$0.30 of the \$2.00 real estate conveyance tax fee charged for each five hundred dollars or fractional part paid for the purchase of property per Rhode Island General Law 45-25-1. The 2007 Assembly converted the real estate conveyance portion to general revenues and made the all funding for the program subject to appropriation.

The 2007 Assembly concurred with the Governor's proposal to freeze communities' FY 2008 aid payments at the FY 2007 level by using older reference data, and fix future amounts at 3.0 percent of tax revenues, ending the phase-up.

The 2005 Assembly enacted Rhode Island General Law 42-61.2-7 , requiring 12.5 percent of the state's share of the new video lottery machine revenue up to a maximum of \$20.0 million be equally allocated to the distressed communities providing that no community receives more than 25.0 percent of that community's currently enacted municipal budget. The 2006 Assembly enacted legislation requiring the dedication of 0.19 percent of all net terminal income, up to a maximum of \$20.0 million, be dedicated to the program. The conversion was neutral, that is, the same amounts were achieved.

The 2009 Assembly provided \$10.4 million from general revenues to fund the program. It also enacted legislation to subject the video lottery terminal funding to appropriation and clarified how much of the appropriation will be distributed equally to each qualifying distressed community.

The 2012 Assembly concurred with the Governor's recommendation to provide \$10.4 million to fund the program. It also adopted legislation to clarify how much of the appropriation will be distributed equally to each qualifying distressed community.

Historically, a majority of the funds was distributed using a weighted allocation; legislation was included in past budgets to allow \$0.8 million previously linked to lottery revenues to be shared equally among the communities. Neither the FY 2014

budget nor the enacted FY 2015 budget includes this legislation. Absent the legislation, all of the funds are distributed on a weighted basis.

- A.** This column lists the tax levies of the qualifying communities.
- B.** This column calculates the percent to the total for each community.
- C.** This column calculates each community's payment based on the percentage in column **B** for all qualifying communities.
- D.** This column shows the weights for payments as previously mentioned. When a community is disqualified, it receives 50.0 percent of payment.
- E.** Column **E** on the next page lists the current law weighted payment, which allows an exiting community to only receive 50.0 percent of its payment.
- F.** Column **F** on the next page would then distribute the remaining 50.0 percent of what would have been paid to the newly qualifying community to the other communities proportionately to lessen the effect of the loss of funds due to the new entrant.
- G.** Column **G** in the table distributes the video lottery machine revenues equally to the qualifying communities as required by Rhode Island General Law 42-61.2-7.
- H.** Column **H** in the table summarizes each community's total payment by adding columns **E**, **F** and **G**.

Appendix VII
Payment in Lieu of Taxes Calculation Data
FY 2015

Payment in Lieu of Taxes Program

The Payment in Lieu of Taxes Program reimburses cities and towns for property taxes, which would have been due on real property owned by nonprofit educational institutions, nonprofit hospitals, or any state-owned hospital, veterans' residential facility or correctional facility, which is exempt from taxation by state law.

The calculation for payment is based on 27.0 percent of the taxes that would have been collected if the property had been taxable. The following steps are used to determine the appropriate amounts for the eligible cities and towns:

A. City and town tax assessors report the value of qualifying properties to the Division of Municipal Finance, which in turn computes the tax dollars that would have been collected for these properties. These tax dollars are shown in the column **A** in the table on the next page. The FY 2015 payment was based on property assessed as of December 31, 2012.

B. The Division of Municipal Finance then calculates 27.0 percent of the taxes that would have been collected by each municipality and the state pays each community that amount in lieu of taxes collected. If the total amount of the appropriation is less than the amount necessary to reimburse communities at 27.0 percent, the statute allows reimbursements to be ratably reduced.

C. The Assembly provided \$40.1 million for FY 2015. The total provided represents a reimbursement of 25.4 percent, which is \$5.0 million more than recommended by the Governor. Distributions to communities reflect updated data and a ratable reduction to the appropriation.

The payments are made in July of each year and are shown in column **C** on the following page. This column shows the proportional reduction of payment to the appropriate level.

Appendix VIII
General Revenue Sharing Calculation Data
FY 2009

General Revenue Sharing

Rhode Island General Law 45-13-1, entitled apportionment of annual appropriation for state aid, details the distribution of the general revenue sharing program funds as follows.

Section 45-13-1 (b), aid to cities and towns shall be apportioned as follows: For each county, city or town, let R be the tax effort divided by the square of per capita income, $R = \text{tax effort} / (\text{income} \times \text{income})$.

The amount to be allocated to the counties shall be apportioned in the ratio of the value of R for each county divided by the sum of the values of R for all five (5) counties.

The amount to be allocated to the all cities and towns within a county shall be the allocation for that county apportioned proportionately to the total tax effort of the towns and cities in that county.

The amount to be allocated to any city or town is the amount allocated to all cities or all towns within the county apportioned in the ratio of the value of R for that city or town divided by the sum of the values of R for all cities or towns in that county; provided, further, that no city or town shall receive an entitlement in excess of 145 percent of that city or town's population multiplied by the average per capita statewide amount of the annual appropriation for state aid to cities and towns. Any excess entitlement shall be allocated to the remainder of the cities and towns in the respective county in accordance with the provisions of this section.

The statewide appropriation for the general revenue sharing program is annually based on 3.0 percent of total state tax revenues collected from the second prior fiscal year as set by schedule in Rhode Island General Law 45-13-1, subject to appropriation. Once the calculation is made statute requires that 0.10 percent of the state's share all net video lottery terminal income up to a maximum of \$10.0 million be allocated to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

The FY 2012 enacted budget does not include any funding for the program.

Step One-Calculation of Tax Effort. The first two tables detail the calculation for each community's tax effort that is used in the general revenue sharing formula.

Tax effort is defined in Rhode Island General Law 45-13-1 as the total taxes imposed by a city or town for public purposes or the totals of those taxes for the cities and towns within a county (except employee and employer assessments and contributions to finance retirement and social insurance systems and other special assessments for capital outlay) determined by the United States Secretary of Commerce for general statistical purposes and adjusted to exclude amounts properly allocated to education expenses.

- A.** Lists actual property taxes collected by the communities as annually reported to the Office of Property Valuation. The data used for the FY 2009 calculation is the same data as used for FY 2008. The 2009 Assembly adopted the Governor's recommendation to subject the program permanently to appropriation.
- B.** Lists actual license and permit fees collected for general operating purposes by the various communities from audited financial statements of the various communities.
- C.** Lists the communities' local taxes that are spent for general educational purposes.
- D.** Lists costs that are incurred for debt related to schools in the various communities.

FY 2009 Calculation of Tax Effort

Total	\$ 1,606,558,127	\$ 34,393,848	\$ 910,131,237	\$ 63,851,762

Step One-Calculation of Tax Effort-Continued. The next table continues the tax effort calculation.

A. Lists community expenditures supported by school housing aid.

B. Summarizes total education aid allowable for the tax effort calculation. It includes Local Taxes to Education, column **C** from the previous table plus Education Debt Costs, column **D** from the previous table, minus School Housing, column **A** from this table.

C. The final column is the actual calculation for tax effort to be included in the general revenue sharing formula. It includes Property Taxes, column **A** from the previous table, plus License and Permits column **B** from the previous table, minus total education aid that was calculated in column **B** of the current table. This final number is the amount of tax effort for each community that is used in the general revenue sharing formula.

Step Two-Calculation of Per Capita Income. The next table details the calculation of per capita income, which is defined in Rhode Island General Law 45-13-1 as the most recent estimate of per-capita income for each city and town as reported by the most recent census report as provided by the United States Department of Commerce, Bureau of the Census.

The 2003 Assembly enacted Article 16 of 2003-H 6174 Substitute A to use a blended rate of 90 percent of the per capita income data from the 1990 census and 10 percent of the per capita income from the 2000 census. This was done to lessen the impact of the 2000 census on the communities in FY 2004. In each of the nine succeeding fiscal years after 2004, the calculation shall be based on a blended rate that increases the percentage of data from the 2000 census by ten percent from the previous year and decreases the percentage of the data utilized from the 1990 census by ten percent from the previous year.

- A.** Lists the per capita income for each community as reported by the Bureau of the Census in the 1990 census.
- B.** Lists the per capita income for each community as reported by the Bureau of the Census in the 2000 census.
- C.** Calculates 60.0 percent of the 1990 per capita income by multiplying column **A** by 60 percent to arrive at the listed figures for each community.
- D.** Calculates 40.0 percent of the 2000 per capita income by multiplying column **B** by 40 percent to arrive at the listed figures for each community.
- E.** Column **E** is the final amount to be used for per capita income for the general revenue sharing program formula. It adds column **C** and column **D** to arrive at the blended rate of 60.0 percent of the 1990 per capita income and 40.0 percent of the 2000 per capita income.

Total	14,981	21,688	8,989	8,675	17,664

Step Three-Calculation of R. R is defined in Rhode Island General Law 45-13-1 as each county, cities and towns tax effort divided by the square of per capita income as reported by the United States Department of Commerce, Bureau of the Census, using the blended rate previously discussed. The value of R is used in several component pieces of the general revenue sharing formula.

A. Column **A** lists each community's tax effort for the general revenue sharing formula that was previously calculated in step one.

B. Column **B** lists each community's per capita income squared, which is part of the calculation of R.

C. Column **C** calculates the percentage value of R for each community that is used in several component parts of the general revenue sharing formula. It is the result of dividing column **A** by column **B** for each community.

FY 2009 Calculation of R

<i>City or Town</i>	<i>A</i>	<i>B</i>	<i>C</i>
	<i>Tax Effort</i>	<i>Per Capita Income Sq.</i>	<i>R</i>

West Greenwich	3,498,757	396,527,569	0.88%
West Warwick	16,591,678	281,467,729	5.89%
Woonsocket	27,659,330	187,333,969	14.76%
Total	\$ 701,563,090	\$ 15,543,926,066	

Step Four-Calculation of Maximum Entitlement. The maximum entitlement award for each community according to Rhode Island General Law 45-13-1(b) is set at 145 percent of each community's population multiplied by the average per capita statewide amount of the annual appropriation for state aid to cities and towns.

Any excess entitlement shall be allocated to the remainder of the cities and towns in the respective county by distributing the excess proportionately to the remaining cities and towns that do not exceed the maximum entitlement through the same formula.

A. The first step in calculating the maximum entitlement award is to list the population for all communities as reported by the Bureau of the Census in the 2000 census. These population figures are shown in column **A**.

B. Column **B** shows the statewide appropriation of \$54.7 million for the FY 2009 general revenue sharing program as the total at the bottom of column **B**.

C. Column **C** calculates the per capita statewide appropriation amount to be used in the calculation to determine each community's maximum entitlement. The amount is arrived at by dividing the statewide appropriation of \$54.7 million by the total state population of 1,048,319. The result is then multiplied by 145 percent and results in the \$75.66 per capita average that is shown for each community.

D. The final column **D** shows each community's maximum entitlement amount. It is calculated by multiplying each community's population in column **A** by the per capita statewide appropriation amount of \$75.66 as shown in column **C**.

FY 2009 Calculation of Entitlement Limits

<i>City or Town</i>	<i>A</i> <i>Population</i>	<i>B</i> <i>Total</i> <i>Appropriation</i>	<i>C</i> <i>Per Capita</i> <i>Statewide</i>	<i>D</i> <i>Maximum</i> <i>Entitlement</i>
Barrington	16,819		\$ 75.66	\$ 1,272,489

Woonsocket	43,224		75.66	3,270,235
Total	1,048,319	\$ 54,699,003		

County Allocations. The general revenue sharing formula begins by calculating the amount to be awarded to the five counties: Bristol, Kent, Newport, Washington and Providence.

A. The calculation begins by listing each county's tax effort as reported by the communities within each county.

B. The next column **B** lists each community's per capita income squared and it totals the five counties for the statewide total of per capita income squared. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data per Rhode Island General Law 45-13-1, as previously discussed.

C. Column **C** calculates the value of each county's R, which is defined as each county's tax effort shown in column **A**, divided by per capita income squared as shown in column **B**.

D. Column **D** calculates the percentage of R for each county, by dividing the amount shown in column **C** for each county, by the total for all five counties as shown in the total amount at the bottom of column **D**.

E. Column **E** calculates the dollars awarded to each county. It is the percent of R as shown in column **D** for each county multiplied by the total state appropriation for the general revenue sharing program of \$54.7 million as shown in the total of column **E**.

F. The Assembly provided \$25.0 million to fund the program in FY 2009, to be distributed proportionally on the same basis as the original enactment, which included \$412,873 from the dedicated 0.10 percent of all net video lottery terminal income to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

FY 2009 General Revenue Sharing - Five Counties

<i>Counties</i>	<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>	<i>E</i>	<i>F</i>
	<i>Tax Effort</i>	<i>Per Capita Income Sq.</i>	<i>R</i>	<i>Percent</i>	<i>Allocation</i>	<i>FY 2009 Ratable Red.</i>
Bristol	\$ 28,481,563	\$ 455,352,921	0.063	2.7%	\$ 1,450,951	\$ 667,769
Kent	105,051,649	375,080,689	0.280	11.9%	6,497,035	2,981,887
Newport	68,233,762	432,764,809	0.158	6.7%	3,657,501	1,683,284
Washington	64,433,471	396,846,241	0.162	6.9%	3,766,399	1,733,402
Providence	435,362,645	256,800,625	1.695	71.9%	39,327,118	17,933,658
Total	\$ 701,563,090	\$ 1,916,845,285	2.358	100.0%	\$ 54,699,003	\$ 25,000,000

Providence County Calculations. The general revenue sharing calculation for Providence County is divided into two calculations, one for the six cities in the county and one for the ten towns in the county. These separate calculations for cities and towns are apportioned proportionally to the total tax effort of the cities and towns in the county based on Rhode Island General Law 45-13-1 (4) (b).

Each community's award is then reviewed to determine if any of the awards exceed the maximum entitlement allocation, if so the excess is distributed to the remaining communities within the county. The excess entitlement funds are distributed proportionately to the remaining communities that do not exceed the maximum entitlement through the same formula.

City Calculation

A. Tax Effort. The calculation for cities within Providence County begins with the listing of each community's tax effort as reported by the cities and this is shown in column **A** of the table on the next page. The column lists each individual city's tax effort as reported and it shows the total for the cities' tax effort within Providence County.

B. Calculate Per Capita Income Squared. Column **B** of the table on the next page lists each community's calculated amount for per capita income squared and it totals the per capita income squared for the cities within Providence County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per Rhode Island General Law 45-13-1.

C. Calculate "R". Column **C** calculates the value of R, which is defined in Rhode Island General Law 45-13-1 as each city's tax effort, divided by per capita income squared for each City. The result is shown in column **C** of the table on the next page and is arrived at by dividing column **A** by column **B**.

D. Calculate Percentage of "R". Column **D** then calculates the percentage of R for each individual city compared to the total R for the cities in Providence County. The calculation divides each community's R-value in column **C** by the total of the Providence County R value shown as the total of column **C**.

E. City Allocation. Column **E** then calculates the first allocation of the actual award to be made to each city. This is based on the total of all the cities tax effort divided by the tax effort of the county multiplied by the percentage of each city's "R" calculated in **D** multiplied by the total general revenue sharing appropriation of \$39.3 million allotted to Providence County that was previously calculated in the five counties allocation. This is the first calculation for each city's award.

Providence County

<i>Cities</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>First</i> <i>Allocation</i>
Central Falls	\$ 9,494,334	\$ 93,973,636	0.101	6.2%	\$ 1,849,203
Cranston	68,120,440	336,502,336	0.202	12.4%	3,705,234
Pawtucket	43,601,212	210,888,484	0.207	12.6%	3,784,181
Providence	156,059,828	177,235,969	0.881	53.7%	16,116,305
Woonsocket	27,659,330	187,333,969	0.148	9.0%	2,702,411
East Providence	27,035,842	270,372,249	0.100	6.1%	1,830,223
Total	\$ 331,970,986	\$1,276,306,643	1.638	100.0%	\$ 29,987,557

Town Calculation

The same calculation is then performed for the ten towns in Providence County, which is shown on the next page.

A. Tax Effort. The calculation for towns within Providence County begins with the listing of each community's tax effort as reported by the towns and this is shown in column **A** of the table on the next page. The column lists each individual town's tax effort as reported and it shows the total for the towns' tax effort within Providence County.

B. Calculate Per Capita Income Squared. Column **B** of the table on the next page lists each community's calculated amount for per capita income squared and it totals the per capita income squared for towns within Providence County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per Rhode Island General Law 45-13-1.

C. Calculate "R". Column **C** calculates the value of R, which is defined in Rhode Island General Law 45-13-1 as each town's tax effort, divided by per capita income squared for each town. The result is shown in column **C** of the table on the next page and is arrived at by dividing column **A** by column **B**.

D. Calculate Percentage of "R". Column **D** then calculates the percentage of R for each individual town compared to the total R for the towns in Providence County. The calculation divides each community's R-value in column **C** by the total of the Providence County R value shown as the total of column **C**.

E. Allocation. Column **E** then calculates the first allocation of the actual award to be made to each town. This is based on the total of all the towns tax effort divided by the tax effort of the county multiplied by the percentage of each town's "R" calculated in **D** multiplied by the total general revenue sharing appropriation of \$39.3 million allotted to Providence County that was previously calculated in the five counties allocation. This is the first calculation for each town's award.

Providence County

<i>Towns</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>First</i> <i>Allocation</i>

Maximum Entitlement Allocation

After the first allocation is calculated for the cities and towns in Providence County, a test must be performed to determine if any communities exceed the maximum entitlement allowable under Rhode Island General Law 45-13-1 (b). This was explained earlier in Step 4 Calculation of Maximum Entitlement.

The following two tables test to see if any of the cities or towns within Providence County exceeds the maximum entitlement. If there are any cities or towns that exceed the maximum entitlement, the excess distribution for these communities must be distributed to the remaining cities and towns proportionately through the same formula used to calculate the first allocation.

A. This column lists the first allocation that was calculated and shown in the previous table.

B. This column lists the Entitlement Limits that were previously calculated in Step 4.

C. This column determines if a community exceeds its maximum allowable entitlement. It takes the entitlement limit and subtracts the first allocation award, column **B** minus column **A**. If the difference, column **C**, results is a negative number then that community has exceeded its maximum entitlement and the difference must be distributed to the remaining communities proportionately through the same formula.

Providence County

	<i>A</i>	<i>B</i>	<i>C</i>
<i>Cities</i>	<i>First Allocation</i>	<i>Entitlement Limits</i>	<i>Difference</i>
Central Falls	\$ 1,849,203	\$ 1,432,052	\$ (417,152)
Cranston	3,705,234	5,997,322	2,292,088

Total	\$ 9,339,561	\$ 13,990,421	\$ 4,650,860

Recalculate-Distributing Excess Entitlements

Once it is determined that there are communities within the county that exceed the maximum entitlement, the excess must be distributed to those communities that do not exceed the maximum entitlements. The calculation is the same except that the communities that exceed the maximum entitlement are left out of the second calculation, since they are capped at 145 percent of the average per capita statewide amount of the annual appropriation.

The following table redistributes the excess amount, which was the amount that the two cities of Central Falls and Providence exceeded the maximum entitlements. This total is shown in column **E** Distribute Excess.

Also note that the Central Falls and Providence total allocations are shown in column **F** and it is the entitlement limit calculated from the previous table.

Cities

A. The tax effort is listed again for this calculation; however, the two cities of Central Falls and Providence are left out of the calculation, due to the fact that these cities will receive the maximum entitlement award shown in the previous table.

B. The per capita income is computed for the cities that do not exceed the maximum entitlement awards.

C. The calculation of R is computed for the cities that do not exceed the maximum entitlement awards.

D. The percentage of R is computed for the cities that do not exceed the maximum entitlement awards.

E. This column distributes the excess entitlements proportionately to the cities and towns that do not exceed the maximum entitlements. The calculation divides the total tax effort for the remaining cities that do not exceed the maximum entitlement by the total tax effort of all the cities and towns in Providence County that do not exceed the maximum entitlement and multiplies it by the percentage of R as calculated in the previous column.

F. This column is the total allocation for each city. It adds the first allocation previously calculated and the amount of the distribution of the excess, shown in column **E**, to arrive at the total allocation for FY 2009.

Providence County

<i>Cities</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>Distribute</i> <i>Excess</i>	<i>F</i> <i>Total</i> <i>Allocation</i>
Central Falls	\$ -	\$ -	-	-	\$ -	\$ 1,432,052

Total	\$ 166,416,824	\$ 1,005,097,038	0.657	100.0%	\$ 2,577,192	\$ 29,166,855

Recalculate-Distributing Excess Entitlements - Towns

Providence County has one town, Johnston that exceeds its maximum allowable entitlement for FY 2009. The excess entitlement must be distributed to the remaining towns in the same manner as the cities' excess was distributed. The following table shows the distribution.

A. The tax effort is listed again for this calculation; however, the town of Johnston is left out of the calculation, due to the fact that it will receive the maximum entitlement award previously calculated and shown in the previous table.

B. The per capita income is computed for the towns that do not exceed the maximum entitlement awards.

C. The calculation of R is computed for the towns that do not exceed the maximum entitlement awards.

D. The percentage of R is computed for the towns that do not exceed the maximum entitlement awards.

E. This column distributes the excess entitlements proportionately to the cities and towns that do not exceed the maximum entitlements. The calculation divides the total tax effort for the remaining towns that do not exceed the maximum entitlement by the total tax effort of all the cities and towns in Providence County that do not exceed the maximum entitlement and multiplies it by the percentage of R as calculated in the previous column.

F. This column is the total allocation for each town. It adds the first allocation previously calculated and the amount of the distribution of the excess, shown in column **E**, to arrive at the total allocation for FY 2009.

Providence County

<i>Towns</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>Distribute</i> <i>Excess</i>	<i>F</i> <i>Total</i> <i>Allocation</i>
Burrillville	\$ 4,180,516	\$ 269,222,464	0.016	7.4%	\$ 91,758	\$ 593,377

Total	\$ 80,153,621	\$ 3,440,311,085	0.210	100.0%	\$ 1,241,288	\$ 10,160,263

Maximum Entitlement Allocation

After the second allocation is calculated for the cities and towns in Providence County, a test must be performed to determine if any communities exceed the maximum entitlement allowable under Rhode Island General Law 45-13-1 (b). This was explained earlier in Step 4 Calculation of Maximum Entitlement.

The following two tables test to see if any of the cities or towns within Providence County exceeds the maximum entitlement. If there are any cities or towns that exceed the maximum entitlement, the excess distribution for these communities must be distributed to the remaining cities and towns proportionately through the same formula used to calculate the first allocation.

A. This column lists the first allocation that was calculated and shown in the previous table.

B. This column lists the Entitlement Limits that were previously calculated in Step 4.

C. This column determines if a community exceeds its maximum allowable entitlement. It takes the entitlement limit and subtracts the first allocation award, column **B** minus column **A**. If the difference, column **C**, results is a negative number then that community has exceeded its maximum entitlement and the difference must be distributed to the remaining communities proportionately through the same formula.

Providence County

	<i>A</i>	<i>B</i>	<i>C</i>
<i>Cities</i>	<i>Second Allocation</i>	<i>Entitlement Limits</i>	<i>Difference</i>
Central Falls	\$ 1,432,052	\$ 1,432,052	\$ -
Cranston	4,499,532	5,997,322	1,497,789

North Providence	2,019,941		2,452,146		432,205
North Smithfield	544,647		803,335		258,688
Scituate	375,691		781,092		405,401
Smithfield	1,674,160		1,559,535		(114,625)
Total	\$ 10,160,263	\$	13,990,421	\$	3,830,158

Recalculate-Distributing Excess Entitlements

Once it is determined that communities within the county still exceed the maximum entitlement, after the second calculation, the excess must be distributed to those communities that do not exceed the maximum entitlements. The calculation is the same except that the communities that exceed the maximum entitlement are left out of the third calculation, since they are capped at 145 percent of the average per capita statewide amount of the annual appropriation.

The following table redistributes the excess amount, which was the amount that the city of Woonsocket exceeded the maximum entitlement in the second calculation. This total is shown in column **E** Distribute Excess.

Also note that the Central Falls and Providence total allocations are shown in column **F** and it is the entitlement limit calculated from the previous table.

Cities

A. The tax effort is listed again for this calculation; however, the cities of Woonsocket Central Falls and Providence are left out of the calculation, due to the fact that these cities will receive the maximum entitlement award shown in the previous table.

B. The per capita income is computed for the cities that do not exceed the maximum entitlement awards.

C. The calculation of R is computed for the cities that do not exceed the maximum entitlement awards.

D. The percentage of R is computed for the cities that do not exceed the maximum entitlement awards.

E. This column distributes the excess entitlements proportionately to the cities and towns that do not exceed the maximum entitlements. The calculation divides the total tax effort for the remaining cities that do not exceed the maximum entitlement by the total tax effort of all the cities and towns in Providence County that do not exceed the maximum entitlement and multiplies it by the percentage of R as calculated in the previous column.

F. This column is the total allocation for each city. It adds the second allocation previously calculated and the amount of the distribution of the excess, shown in column **E**, to arrive at the total allocation for FY 2009.

Providence County

<i>Cities</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>Distribute</i> <i>Excess</i>	<i>F</i> <i>Total</i> <i>Allocation</i>

Final Calculation

The final calculation for the General Revenue Sharing program includes the distribution of the dedicated 0.10 percent of all net video lottery terminal income up to a maximum of \$10.0 million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

The following two pages show that calculation for the cities and towns within Providence County.

A. Column **A** shows the amount based on the calculations for the General Revenue Sharing program.

B. Column **B** shows the amount of the dedicated state share of the video lottery terminal income that is disbursed proportionately based on the general revenue sharing distribution to all communities that do not qualify for the distressed communities program.

C. Column **C** summarizes the two amounts: the original FY 2009 enacted payment to each community within the county.

D. Column **D** illustrates the FY 2009 final payment to each community within the county, which reflects a proportional reduction from the enacted budget.

Providence County

<i>Cities</i>	<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>

Washington County

The calculation for Washington County is performed in the same manner except that there are no cities within Washington County therefore separate calculations are not required, and only one table is shown on the following page.

A. Tax Effort. The calculation for towns within Washington County begins with the listing of each community's tax effort as reported by the towns and this is shown in column **A** of the table on the next page. The column lists each individual town's tax effort as reported and it shows the total for the towns' tax effort within Washington County.

B. Calculate Per Capita Income Squared. Column **B** of the table on the next page lists each community's calculated amount for per capita income squared and it totals the per capita income squared for towns within Washington County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per Rhode Island General Law 45-13-1.

C. Calculate "R". Column **C** calculates the value of R, which is defined in Rhode Island General Law 45-13-1 as each town's tax effort, divided by per capita income squared for each town. This amount is shown in column **C** of the table on the next page. The result is calculated by dividing column **A** by column **B**, and the column totals the Washington County value of R.

D. Calculate Percentage of "R". Column **C** then calculates the percentage of R for each individual town compared to the total R for the towns in Washington County.

E. Town Allocation. Column **E** then calculates the first allocation of the actual award to be made to each town. This is based on the percentage of each town's "R" calculated in **D** compared to the total "R" for the Washington County, multiplied by the total general revenue sharing appropriation of \$3.8 million allotted to Washington County that was previously calculated in the five counties allocation. This is the first calculation for each town's award.

Washington County

<i>Towns</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>First</i> <i>Allocation</i>

Maximum Entitlement Allocation

After the first allocation is calculated for the towns in Washington County, a test must be performed to determine if any communities exceed the maximum entitlement allowable under Rhode Island General Law 45-13-1 (b). This was explained earlier in Step 4 Calculation of Maximum Entitlement.

The following table tests to see if any of the towns within Washington County exceeds the maximum entitlement. If there are any towns that exceed the maximum entitlement, the excess distribution for these communities must be distributed to the remaining towns proportionately through the same formula used to calculate the first allocation.

A. This column lists the first allocation that was calculated and shown in the previous table.

B. This column lists the Entitlement Limits that were previously calculated in Step 4.

C. This column determines if a community exceeds its maximum allowable entitlement. It takes the entitlement limit and subtracts the first allocation award, column **B** minus column **A**. If the difference, column **C**, results is a negative number then that community has exceeded its maximum entitlement and the difference must be distributed to the remaining communities through the same formula.

Washington County

<i>Towns</i>	<i>A</i>	<i>B</i>	<i>C</i>
	<i>First Allocation</i>	<i>Entitlement Limits</i>	<i>Difference</i>
Charlestown	\$ 336,594	\$ 594,595	\$ 258,001
Exeter	74,730	457,352	382,621
Hopkinton	186,435	592,855	406,419
Narragansett	728,148	1,237,838	509,690
North Kingstown	734,611	1,991,768	1,257,158
Richmond	122,419	546,401	423,982
South Kingstown	838,410	2,112,443	1,274,033
Westerly	625,378	1,737,558	1,112,180
New Shoreham	119,672	76,414	(43,258)
Total	\$ 3,766,399		

Recalculate-Distributing Excess Entitlements

Washington County has one town, New Shoreham, that exceeds its maximum allowable entitlement for FY 2009. The excess entitlement must be distributed to the communities that do not exceed the maximum entitlements. The calculation is the same except that the communities that exceed the maximum entitlement are left out of the second calculation, since they are capped at 145 percent of the average per capita statewide amount of the annual appropriation.

A. The tax effort is listed again for this calculation; however, the town of New Shoreham is left out of the calculation, due to the fact that it will receive the maximum entitlement award previously calculated and shown in the previous table.

B. The per capita income is computed for the towns that do not exceed the maximum entitlement awards.

C. The calculation of R is computed for the towns that do not exceed the maximum entitlement awards.

D. The percentage of R is computed for the towns that do not exceed the maximum entitlement awards.

E. This column distributes the excess entitlements proportionately to the towns that do not exceed the maximum entitlements. The calculation divides the total tax effort for the remaining towns that do not exceed the maximum entitlement by the total tax effort of all the towns in Washington County that do not exceed the maximum entitlement and multiplies it by the percentage of R as calculated in the previous column.

F. This column is the total allocation for each town. It adds the first allocation previously calculated and the amount of the distribution of the excess, shown in column **E**, to arrive at the total allocation for FY 2009.

Washington County

<i>Towns</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>Distribute Excess</i>	<i>F</i> <i>Total Allocation</i>
Charlestown	\$ 5,444,784	\$ 386,633,569	0.014	9.2%	\$ 3,993	\$ 340,587
Exeter	1,175,151	375,855,769	0.003	2.0%	886	75,617

South Kingstown	11,524,845	328,551,876	0.035	23.0%	9,946	848,356
Westerly	9,930,797	379,548,324	0.026	17.1%	7,418	632,796
New Shoreham	-	-	-	-	-	76,414
Total	\$ 61,529,999	\$ 3,091,939,016	0.153	100.0%	\$ 43,259	\$ 3,766,400

Final Calculation

The final calculation for the General Revenue Sharing program includes the distribution of the dedicated 0.10 percent of all net video lottery terminal income up to a maximum of \$10.0 million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

The following page shows that calculation for the towns within Washington county.

A. Column **A** shows the amount based on the calculations for the General Revenue Sharing program.

B. Column **B** shows the amount of the dedicated state share of the video lottery terminal income that is disbursed proportionately based on the general revenue sharing distribution to all communities that do not qualify for the distressed communities program.

C. Column **C** summarizes the two amounts; the original FY 2009 enacted payment to each community within the county.

D. Column **D** illustrates the FY 2009 final payment to each community within the county, which reflects a proportional reduction from the enacted budget.

Washington County

<i>Towns</i>	<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>
	<i>Total Allocation</i>	<i>Dedicated Video Lottery Terminal Income</i>	<i>FY 2009 Enacted</i>	<i>FY 2009 Ratable Reduction</i>
Charlestown	\$ 340,587	\$ 4,959	\$ 345,546	\$ 156,748
Exeter	75,617	1,101	76,718	34,801

New Shoreham	76,414	1,113	77,527	35,168
Total	\$ 3,766,400	\$ 54,842	\$ 3,821,241	\$ 1,733,402

Newport County

The general revenue sharing calculation for Newport County is divided into two calculations, one for the city of Newport and one for the five towns within the county.

Due to the fact that there is only one city in Newport County, the City of Newport receives its award based on the city's percentage of tax effort compared to the county's total tax effort multiplied by the general revenue sharing appropriation of \$3.7 million allotted to Newport County that was previously calculated in the five counties allocation. This is shown in the table on the next page.

A. Tax Effort. The calculation for towns within Newport County begins with the listing of each community's tax effort as reported by the towns and this is shown in column **A** of the table on the next page. The column lists each individual town's tax effort as reported and it shows the total for the towns' tax effort within Newport County.

B. Calculate Per Capita Income Squared. Column **B** of the table on the next page lists each community's calculated amount for per capita income squared and it totals the per capita income squared for towns within Newport County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per Rhode Island General Law 45-13-1.

C. Calculate "R". Column **C** calculates the value of R, which is defined in Rhode Island General Law 45-13-1 as each town's tax effort, divided by per capita income squared for each town. This amount is shown in column **C** of the table on the next page. The result is calculated by dividing column **A** by column **B**, and the column totals the Newport County value of R.

D. Calculate Percentage of "R". Column **D** then calculates the percentage of R for each individual town compared to the total R for the towns in Newport County.

E. Allocation. Column **E** then calculates the first allocation of the actual award to be made to each town. This is based on the total percentage of each town's "R" calculated in **D** compared to the total "R" for the Newport County, multiplied by the total general revenue sharing appropriation of \$3.7 million allotted to Newport County that was previously calculated in the five counties allocation less the amount awarded to the City of Newport. This is the first calculation for each town's award.

Newport County

<i>City</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>First</i> <i>Allocation</i>
Newport	\$ 28,772,548	\$ -	-	-	\$ 1,542,281
Total	\$ 28,772,548	\$ -	-	-	\$ 1,542,281

<i>Towns</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>First</i> <i>Allocation</i>
Jamestown	\$ 4,218,755	\$ 804,913,641	0.005	5.29%	\$ 124,382
Little Compton	2,396,746	573,363,025	0.004	4.2%	88,240
Middletown	13,381,916	342,213,001	0.039	39.4%	814,944
Portsmouth	11,332,663	440,076,484	0.026	26.0%	546,314
Tiverton	8,131,134	326,741,776	0.025	25.1%	541,341
Total	\$ 39,461,214	\$2,487,307,927	0.099	100.0%	\$ 2,115,221

Maximum Entitlement Allocation

After the first allocation is calculated for the communities in Newport County, a test must be performed to determine if any communities exceed the maximum entitlement allowable under Rhode Island General Law 45-13-1 (b). This was explained earlier in Step 4 Calculation of Maximum Entitlement.

The following table tests to see if any of the communities within Newport County exceeds the maximum entitlement. If there are communities that exceed the maximum entitlement, the excess distribution for these communities must be distributed to the remaining communities proportionately through the same formula used to calculate the first allocation.

A. This column lists the first allocation that was calculated and shown in the previous table.

B. This column lists the Entitlement Limits that were previously calculated in Step 4.

C. This column determines if a community exceeds its maximum allowable entitlement. It takes the entitlement limit and subtracts the first allocation award, column **B** minus column **A**. If the difference, column **C**, results is a negative number then that community has exceeded its maximum entitlement and the difference must be distributed to the remaining communities through the same formula.

Newport County

	<i>A</i>	<i>B</i>	<i>C</i>
<i>City</i>	<i>First Allocation</i>	<i>Entitlement Limits</i>	<i>Difference</i>
Newport	\$ 1,542,281	\$ 2,003,041	\$ 460,761

Little Compton	88,240	271,839	183,598
Middletown	814,944	1,311,453	496,509
Portsmouth	546,314	1,297,456	751,143
Tiverton	541,341	1,154,539	613,198
Total	\$ 2,115,221	\$ 4,460,635	\$ 2,345,414

Recalculate-Distributing Excess Entitlements

Newport County did not have any communities that exceeded their maximum allowable entitlement for FY 2009. Therefore no recalculation is required to distribute any excess entitlement funds in this county. Note that column **E** Distribute Excess in the following table does not have any amounts shown in it. The first allocation previously computed becomes the final allocation for FY 2009 as shown in column **F** of the following table.

Newport County

<i>City</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>Distribute</i> <i>Excess</i>	<i>F</i> <i>Total</i> <i>Allocation</i>
Newport	\$ 27,949,463	\$ -	-	-	\$ -	\$ 1,542,281
Total	\$ 27,949,463	\$ -	-	-	\$ -	\$ 1,542,281

<i>Towns</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>Distribute</i> <i>Excess</i>	<i>F</i> <i>Total</i> <i>Allocation</i>

Kent County Calculation

The general revenue sharing calculation for Kent County is divided into two calculations, one for the city of Warwick and one for the four towns within the county.

Due to the fact that there is only one city in Kent County, the City of Warwick receives its award based on the city's percentage of tax effort compared to the county's total tax effort multiplied by the general revenue sharing appropriation of \$6.5 million allotted to Kent County that was previously calculated in the five counties allocation. This is shown in the table on the next page.

A. Tax Effort. The calculation for towns within Kent County begins with the listing of each community's tax effort as reported by the towns and this is shown in column **A** of the table on the next page. The column lists each individual town's tax effort as reported and it shows the total for the towns' tax effort within Kent County.

B. Calculate Per Capita Income Squared. Column **B** of the table on the next page lists each community's calculated amount for per capita income squared and it totals the per capita income squared for towns within Kent County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per Rhode Island General Law 45-13-1.

C. Calculate "R". Column **C** calculates the value of R, which is defined in Rhode Island General Law 45-13-1 as each town's tax effort, divided by per capita income squared for each town. This amount is shown in column **C** of the table on the next page. The result is calculated by dividing column **A** by column **B**, and the column totals the Kent County value of R.

D. Calculate Percentage of "R". Column **D** then calculates the percentage of R for each individual town compared to the total R for the towns in Kent County.

E. Allocation. Column **E** then calculates the first allocation of the actual award to be made to each town. This is based on the percentage of each town's "R" calculated in **D** compared to the total "R" for the Kent County, multiplied by the total general revenue sharing appropriation of \$6.5 million allotted to Kent County that was previously calculated in the five counties allocation, less the amount awarded to the City of Warwick. This is the first calculation for each town's award.

Kent County

	<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>	<i>E</i>
<i>City</i>	<i>Tax Effort</i>	<i>Per Capita Income Sq.</i>	<i>R</i>	<i>Percent R</i>	<i>First Allocation</i>

Total	\$ 2,427,386	\$ 17,204	\$ 2,444,590	\$ 1,108,922

Bristol County Calculation

The general revenue sharing calculation for Bristol County has one calculation for the three towns within the county. There are no cities in Bristol County; therefore, only one calculation is required.

A. Tax Effort. The calculation for towns within Bristol County begins with the listing of each community's tax effort as reported by the towns and this is shown in column **A** of the table on the next page. The column lists each individual town's tax effort as reported and it shows the total for the towns; tax effort within Bristol County.

B. Calculate Per Capita Income Squared. Column **B** of the table on the next page lists each community's calculated amount for per capita income squared and it totals the per capita income squared for towns within Bristol County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per Rhode Island General Law 45-13-1.

C. Calculate "R". Column **C** calculates the value of R, which is defined in Rhode Island General Law 45-13-1 as each town's tax effort, divided by per capita income squared for each town. This amount is shown in column **C** of the table on the next page. The result is calculated by dividing column **A** by column **B**, and the column totals the Bristol County value of R.

D. Calculate Percentage of "R". Column **D** then calculates the percentage of R for each individual town compared to the total R for the towns in Bristol County.

E. Allocation. Column **E** then calculates the first allocation of the actual award to be made to each town. This is based on the percentage of each town's "R" calculated in **D** compared to the total "R" for the Bristol County, multiplied by the total general revenue sharing appropriation of \$1.5 million allotted to Bristol County that was previously calculated in the five counties allocation. This is the first calculation for each town's award.

Bristol County

<i>Towns</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>First</i> <i>Allocation</i>
Barrington	\$ 8,984,186	\$ 860,307,561	0.010	14.0%	\$ 203,246
Bristol	12,412,980	291,658,084	0.043	57.1%	828,323
Warren	7,084,397	328,769,424	0.022	28.9%	419,381
Total	\$ 28,481,563	\$1,480,735,069	0.075	100.0%	\$ 1,450,951

Maximum Entitlement Allocation

After the first allocation is calculated for the communities in Bristol County, a test must be performed to determine if any communities exceed the maximum entitlement allowable under Rhode Island General Law 45-13-1 (b). This was explained earlier in Step 4 Calculation of Maximum Entitlement.

The following table tests to see if any of the communities within Bristol County exceeds the maximum entitlement. If there are communities that exceed the maximum entitlement, the excess distribution for these communities must be distributed to the remaining towns proportionately through the same formula used to calculate the first allocation.

A. This column lists the first allocation that was calculated and shown in the previous table.

B. This column lists the Entitlement Limits that were previously calculated in Step 4.

C. This column determines if a community exceeds its maximum allowable entitlement. It takes the entitlement limit and subtracts the first allocation award, column **B** minus column **A**. If the difference, column **C**, results is a negative number then that community has exceeded its maximum entitlement and the difference must be distributed to the remaining communities through the same formula.

Bristol County

	<i>A</i>	<i>B</i>	<i>C</i>
<i>Towns</i>	<i>Allocation</i>	<i>Entitlement Limits</i>	<i>Difference</i>
Barrington	\$ 203,246	\$ 1,272,489	\$ 1,069,243
Bristol	828,323	1,699,956	871,633
Warren	419,381	859,473	440,092
Total	\$ 1,450,951	\$ 3,831,918	\$ 2,380,968

Recalculate-Distributing Excess Entitlements

Bristol County did not have any communities that exceeded their maximum allowable entitlement for FY 2009. Therefore no recalculation is required to distribute any excess entitlement funds in this county. Note that column **E** Distribute Excess in the following table does not have any amounts shown in it. The first allocation previously computed becomes the final allocation for FY 2009 as shown in column **F** of the following table.

Bristol County

<i>Towns</i>	<i>A</i> <i>Tax Effort</i>	<i>B</i> <i>Per Capita</i> <i>Income Sq.</i>	<i>C</i> <i>R</i>	<i>D</i> <i>Percent R</i>	<i>E</i> <i>Distribute</i> <i>Excess</i>	<i>F</i> <i>Total</i> <i>Allocation</i>
Barrington	\$ 8,984,186	\$ 860,307,561	0.010	14.0%	-	\$ 203,246
Bristol	12,412,980	291,658,084	0.043	57.1%	-	828,323
Warren	7,084,397	328,769,424	0.022	28.9%	-	419,381
Total	\$ 28,481,563	\$ 1,480,735,069	0.075	100.0%	-	\$ 1,450,951

Final Calculation

The final calculation for the General Revenue Sharing program includes the distribution of the dedicated 0.10 percent of all net video lottery terminal income up to a maximum of \$10.0 million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

The following page shows that calculation for the cities and towns within Bristol county.

A. Column **A** shows the amount based on the calculations for the General Revenue Sharing program.

B. Column **B** shows the amount of the dedicated state share of the video lottery terminal income that is disbursed proportionately based on the general revenue sharing distribution to all communities that do not qualify for the distressed communities program.

C. Column **C** summarizes the two amounts; the original FY 2009 enacted payment to each community within the county.

D. Column **D** illustrates the FY 2009 final payment to each community within the county, which reflects a proportional reduction from the enacted budget.

Bristol County

<i>Towns</i>	<i>A</i> <i>Total Allocation</i>	<i>B</i> <i>Dedicated Video Lottery Terminal Income</i>	<i>C</i> <i>FY 2009 Enacted</i>	<i>D</i> <i>FY 2009 Ratable Reduction</i>
Barrington	\$ 203,246	\$ 2,959	\$ 206,205	\$ 93,540
Bristol	828,323	12,061	840,384	381,217
Warren	419,381	6,107	425,488	193,011
Total	\$ 1,450,951	\$ 21,127	\$ 1,472,078	\$ 667,769

Appendix IX
Library Aid Calculation Data
FY 2015

State Library Aid

Section 29-6-2 of the Rhode Island General Laws requires that the state share of support to public libraries be 25.0 percent of the amount appropriated and expended in the second preceding fiscal year by each city and town from local tax revenues. It allows for a ratable reduction to the appropriation. The calculations for FY 2015 aid are described below and shown in the table on the following page. The bold italicized letters at the top of the columns in the tables correspond to the calculation steps described below.

A. Calculate Total for Distribution. The Office of Library and Information Services determines the total library aid payment each fiscal year, based on the second preceding fiscal year total local expenditures. For FY 2015, expenditures totaled \$31.2 million, shown in column **A** of the table on the next page.

B. Calculate FY 2015 Distributions. The Office calculates what each community would be eligible to receive for FY 2015 based on 25.0 percent of its FY 2013 expenditures, as shown in column **A**. It should be noted that any hold harmless concept was phased in over a three year period that ended in FY 2006. Effective FY 2007, no **C** communities are held harmless.

C. Endowment Funding. Section 29-6-2 of the General Laws establishes that the grant to all libraries includes endowment funding in the second preceding, year up to a maximum of 6.0 percent of the three-year average market value of the endowment, calculated at the end of the calendar year. For FY 2015 this is \$667,309, shown in column **C**.

Although it is not shown in the table, it should be noted that the City of Providence receives \$1.0 for the Statewide Reference Library Resource Grant, designed to allow the library to develop its reference collection, provide email reference service on the state website and provide research expertise in specialized areas such as patents and private foundation funding. Funding allows the entire state to benefit from this service.

D. Ratable Reduction. The 2014 Assembly provided \$8.8 million for FY 2015 library operating aid, which is consistent with the enacted level but \$1.0 million or 11.4 percent less than current law requirements. Community distributions are 88.6 percent of the full entitlement to reflect a ratable reduction to the appropriation.

E. FY 2015 Library Aid. Column **E** contains the total award for each community for FY 2015.

FY 2015 Calculation of Library Aid

<i>City or Town</i>	<i>A FY 2013 Expenditures</i>	<i>B 25% FY 2013 for FY 2015</i>	<i>C Endowment Funding</i>	<i>D Ratable Reduction</i>	<i>E FY 2015 Library Aid</i>
