**Subject:** Oppose 2346

Good evening honorable members of the RI Senate Commerce Committee:

I oppose S2346

As a town councilor for East Greenwich, I am concerned not only about additional breaks for corporations but also about where centers will be located. Will they be going within 500 ft of residential property? Rhode Island has high-density residential areas and very little open space either in natural areas or commercial areas. In East Greenwich, we are concerned with noise and additional traffic in our neighborhoods, a concern I know all municipalities share. Please add more clarity regarding the data center bill.

Yours  
Renu Englehart  
East Greenwich
