RE: Letter of Support for S2641: An Act Relating To Public Utilities And Carriers -- Duties Of Utilities And Carriers

Dear Chair Britto:

I write to you in strong support of S2641: An Act Relating To Public Utilities And Carriers -- Duties Of Utilities And Carriers. This bill establishes statewide standards governing electric meter reading and billing practices.

The rising costs of utilities in Rhode Island is putting a lot of working-class residents in difficult positions. In our office, we hear from many constituents who call in looking for support to keep their heat on. There are a lot of policies, regulations, and procedures that inflate the cost of utilities in our state, and among them are the policies surrounding how frequently a meter is read.

Reading the meter helps a utility provider determine how much energy has been consumed by an individual household. While monthly readings ensure the most accurate data for billing purposes, oftentimes utility companies rely on fewer readings, supplemented by formulas and estimates to determine a ratepayer's monthly utility bill. While this may be more convenient for the major energy suppliers, this means that many ratepayers are paying for more energy than they consume. This bill resolves that by placing limits on estimated billing and requiring regular meter readings.

Nobody in our state should be left in the cold because they cannot afford their utilities. This bill advocates on behalf of ratepayers by requiring accurate readings to ensure that residents pay only for the energy that they use. I urge you to vote this bill favorably out of committee.

Sincerely,

A handwritten signature in black ink that reads "Sabina Matos". The signature is written in a cursive, flowing style.

Sabina Matos
Lieutenant Governor, State of Rhode Island
CC: Senator Samuel Zurier
