Dear Chair Britto and members of the Senate Commerce Committee,

My name is Camille Nixon, a resident of Warren, RI. I write in favor of S2646 AN ACT RELATING TO INSURANCE -- RHODE ISLAND INSURANCE MARKET PROTECTION ACT

I agree with what my colleague and friend, Barbara Watts, of Citizens' Climate Lobby (CCL) writes:

"It is well known that climate change is costly. Damage caused by rising sea levels and extreme weather events with associated flooding is impacting Rhode Island homeowners

now. In fact the state has produces an excellent report on the situation: our statewide coastal resilience plan, [Resilient Rhody](#).

These impacts have begun to affect homeowners' insurance costs and these impacts will

only increase in the future. Insurance companies are perfectly aware that climate change is

making homes more costly to insure, and yet they are investing in fossil fuels that make the

situation worse. Insurance companies profit while Rhode Island residents, municipalities

and state agencies lose.

In a year when 'Affordability' for RI citizens appears to at the top of the list of concerns of the Governor, it seems S2646 would be an ideal law to pass."

I... "thank Senators Euer, Kallman, Lauria, DiMario, Zurier, Ujifusa, Mack, Murray and Gu for introducing this bill that clearly points out the contradiction of charging for climate impacts while investing in the principal cause of climate change by the insurance industry. Moreover, the bill proposes an ideal solution to the problem!"

Sincerely,
Camille Nixon
Warren, RI 02885
