Dear Committee Members and Senate Leadership,

I strongly support the introduction of an amended version of S3224 that has the expiration date removed. Our State Representatives are already moving the companion legislation forward in the House and we urgently need our leaders in the Senate to champion this cause as well. I respectfully ask that you vote an amended version of this bill out of committee recommending passage by the full chamber during the legislative session.

The citizens of North Kingstown do not want a sewage sludge pyrolysis plant in their community. Recent public comments have highlighted grave concerns regarding the accumulation of mercury- a known neurotoxin with long-lasting generational impacts- and benzene, an established class 1 carcinogen for which no safe exposure limit is known. With over 20 other hazardous particles and emissions documented in the pyrolysis plant's minor source air permit application it is clear that these facilities do not belong in the middle of our homes, schools, and sole water sources. We do not need to wait on commission results to tell us this is the wrong place for this type of technology.

Beyond the immediate need to protect community health the expedited timeline and negligible public comment opportunities early in this facility's processes have severely damaged the community relationship with Quonset Development Corporation (QDC), an entity critical to both the town and the state economy. Passing this bill without an expiration date will give the community the confidence that a new pyrolysis plant under a different LLC is not waiting right around the corner. This foundational safety is a critical precursor to bolstering and repairing the QDC-North Kingstown relationship that has served the state so well over the last several decades.

Thank you for your time and service.

Sincerely,

Julia McKay  
10 Armington Avenue  
North Kingstown
