Hello-

I am writing this email in opposition of Senate Bill S2934. This bill is a direct affront to the collective bargaining rights of an established labor union, PTU 958. Not only is it a direct attack against a specific local, but it begins the erosion of collective bargaining rights of ALL unions. This piece of legislation goes against the bedrocks of our democracy, the laws that apply to everyone. This bill discriminates, specifically against only one local, and I am shocked that this piece of legislation has gotten to this point. What other legislation targets ONE group of citizens?

This legislation would risk destabilizing our educational system, undermine job security, and worsen existing teacher shortages, directly harm students, and stop Providence from attaining high quality educators. Please prioritize the stability of our school system and oppose S2934.

Thank you,
Katelynn Barsamian
