To whom it may concern:

I oppose legislation S2934. I am a teacher in Providence and should have the same rights as other teachers in the state of RI. We should not have to negotiate salary schedules that should be done through our union. We should also not be giving principals the right to dismiss teachers who are qualified/certified in content area. Also, qualified teachers with tenure who are displaced will interview for open positions. It is not a job fair any more for all teachers positions. Under no circumstances should one district be targeted over all 36 public school districts.
